Sugar Mill is in Action

Slicker clad workmen in the beet
sheds, starts the 1928 beet crop roll-
ing into the huge mill Wednesday
morning, while the fury of the first
snow beat down upon them.

Within the sound of hissing
steam and rolling beets marks the
beginning of another successful run.

It is estimated that about thirty
five thousand tons of beets will be
ground covering a period of some
six to eight weeks.

Officials declare they have one
of the best crews they have ever
had. The machinery throughout
the plant has been thoroughly
overhauled and is in tip top shape
thus making a very promising out-
look for the coming run.

It is with extreme pleasure that
we note the benefits our town has
received through the establish-
ment of the sugar factory in this
district. Farmers are becoming
better acquainted with the more in-
tensified methods of farming that
is so necessary to make beet rais-
ing a financial success. They are
rapidly learning the value of the
by-products for stock feed. They
can see results in the wheat crop
planted on beet land. The weed
menace is more nearly controlled
by the cultivated crop.

S. of A. Staff

The enrolment at the School of
Agriculture at the present time
has reached fifty three, and it is
confidently expected that this
number will be doubled before the
school starts. Of the number en-
rolled 13 are from the Taber-Barn-
well district and only 19 from
our own town, but it is hoped
that many more local students
will be enrolled in the next three
weeks.

A special campaign for students
is now underway. Mr. D. L.
Gilbert is working over the Stirl-
ing and Coaldale districts and
part of the Lethbridge Northern.
Principal O. S. Longman and Mr.
Charles Asplund are soliciting in
the western districts.

Mr. Longman announces his staff
for the coming term as follows:
O. S. Longman, B. S. A., principal
and instructor in Farm Manage-
ment and Co-operative Marketing.
C. O. Asplund, B. S. A., Farm
Manager and instructor in Ani-
mal Husbandry. W. Smith, B. Sc.,
instructor in Field Husbandry.
D. L. Gilbert, B. S. A., instructor
in English and Mathematics. T.
C. McBeth, B. Sc., instructor in
Science. E. A. Barragar, B. S. A.,
instructor in Mechanics. Miss J.
M. Redig, B. H. Sc., instructress in
Household Economics. Miss A. P.
Scott, instructress in Household
Science. Miss M. E. McMurray,
R. N., instructress in Nursing. E.
Cormack, B. Sc., instructor in
Dairying. Dr. C. Haworth, in-
structor in Veterinary Science. S.
Hillier, B. S. A., instructor in
Apiculture.

During the storm on Tuesday
a telephone pole near Jack Me-
hew's residence was blown down
carrying with it the adjacent elec-
tric light wires. On Wednesday
morning a cow trailing a long
chain became entangled in the
wires, which were bare, and the
cow was electrocuted. A few min-
utes later a dog trotting down the
street stepped on the chain and
was instantly killed. Mr. Mehew's
little daughter, on her way to
School, touched the cow and was
knocked unconscious, but was not
seriously injured. Damage to the
line was immediately repaired.

Capitol Theatre Makes its Debut

Last Saturday night saw the
official opening of Brewerton's
new Capitol Theatre.

500 patron marked the initial
performance with success. The
house was crowded to capacity
and many were turned away.

Many voiced their approval of
the beautiful interior decorations,
the cushioned upholstered seats,
wide and comfortable, making an
enjoyable evening complete with
solid comfort. An atmosphere of
beauty surrounds the theatre, mak-
ing one feel that he has entered
a place of entertainment in some
large city.

The words of the visiting theatre
inspector Mr. Barber, shows more
clearly the relative value of this
beautiful structure. He states that
in all his travels as a provincial
theatre inspector he has failed to
find a small town theatre so com-
pletely modern in every respect.
Beauty is expressed from the ex-
terior to the interior. Fire haz-
ards are reduced to a minimum.
The only inflammable material used
is the film and that is kept in a
steel container, within the walls
of a completely fireproof operating
room. "In fact," says Mr. Barber,
"this is an ideal theatre." Inqui-
ries are already being received re-
garding the plans.

To add to the completeness of the
theatre, the new Photophone has
recently been installed. This ma-
chine was shipped express from
Indiana and cost in the neighbor-
hood of \$1200. The Photophone is
a new musical instrument design-
ed for the modern theatre. Musi-
cal effects can be produced that
completely harmonize with the
scene depicted on the screen thus
making the entertainment com-
plete.

Council Meeting

The Town Council held their
semi-monthly meeting last Thurs-
day night.

Mrs. M. Boyson petitioned the
Council for support for her hospi-
tal. This matter was discussed
and the secretary instructed to
write the provincial Department
of Health regarding the particulars
pertaining to this class of hospital.

A new by-law was passed ap-
pointing Constable VanOrman to
the position of fire chief and
health inspector, and S. Dyson to
the position of special constable.

Communication was received
from the Provincial Water Com-
missioner regarding the reserva-
tion of two sites by the town for
supply reservoirs. The Council
was advised that an inspector
would be sent to investigate.

Inspector Marshall of Leth-
bridge was in town last week and
in company with Mayor Cope and
Secretary Snow inspected the pro-
posed reservoir sites. The town
was allowed to reserve these two
locations, one at the canal flume
over the coulee just south east of
town, and the other near the farm
of J. U. Alfred, in the hills south
of town.

King's Canadians will entertain
tomorrow night at the Opera
House with a Harvest Ball.

Real Foundation of Modern Business

The so-called practical man of business, the financier, the farmer, during the many decades of the past has been inclined to regard the scientist as hopelessly impracticable, a dreamer, a faddist. Within more recent years marked change in this respect has taken place, and today the scientist, the chemist, the laboratory research worker, is recognized as among the most practical and essential of the world's workers.

To the great universities of the world, and to Governments must be credited in large degree the recognition now accorded to the scientist, while many of the world's foremost industrial concerns now regard their research departments as being among the most profitable departments of their great enterprises.

A recent article by Dr. E. E. Free in "Chemical Markets," New York, declares that science earns for the United States more than thirty billion dollars a year, or nearly half of the national income. It has, he says, doubled the productivity of agriculture and more than quadrupled that of mining. Continuing, Dr. Free wrote: "Surely the business men of America ought to be convinced by now that it is worth while to exhaust every one of science's industrial resources; yet the surprising fact is not only that these resources are unexploited, but that only a small fraction of them have been put to work. Not a tenth of the facts that scientists know are being used. The rest of them lie idle in the heads of professors or in the unread pages of scientific books."

Son years ago a gentleman named Dudley became a chief chemist of one of the large American railways. He devised methods of testing coal and coke and lubricating oils, and saved millions of dollars for his road. He helped the steel people find out how to make more lasting rails. He invented cheaper and better paints. He suited the available water supplies to the engines, and saved millions of boiler tubes from being burnt out or corroded. It is estimated that the scientific improvements devised by Dr. Dudley and his successors on other railways have saved more money than all the railroad wages ever paid in the United States.

Sometimes a scientific problem solves itself as if by magic. The origin of the potash industry is an example. The salt miners of Germany a generation ago were bothered greatly by some bitter, evil-tasting stuff mixed with the salt they were trying to mine. This bitter stuff had to be taken out, but if they piled it up anywhere the ruin always washed some of it down into the rivers where it spoiled the water and poisoned the fish. Then a great chemist, Dr. Justus von Liebig, happened to hear about this worthless stuff. He found out there was potash in it. He knew that crop plants need potash—that it could be used as a fertilizer. He suggested this to the farmers of Germany. Now the potash industry is one of the greatest in the world. The useless, bitter stuff became the chief assets of the mines.

Tons of sulphuric acid and arsenic used to be blown out of the smoke stacks of copper smelters, sometimes killing animals and crops on neighboring farms. A scientist built an electric apparatus which collects these poisonous particles out of the smelter smoke. The apparatus is now in use all over the world, and the sulphuric acid, instead of floating out to damage the farms, is used in chemical industry, while the arsenic has become the chief reliance of the scientists who are fighting the boll-weevil, which threatens the destruction of the cotton plantations of the southern states.

In like manner we have the story of the botany professor who cleared the western United States irrigation ditches of a weed that was choking them and compelling the farmers to employ a man night and day to clear the intake of the pipe line. "Suspend a few crystals of copper sulphate in the ditches, in little canvas bags," he advised. The weeds died and disappeared in a week. This scientist knew that copper was especially poisonous to that kind of weed. His practical knowledge increased the wealth of the whole irrigated region.

In Saskatchewan a clay-working industry was having trouble with its raw products. One of the professors of the University of Saskatchewan was called in, and as a result of his knowledge, investigations and tests, he found that the correct mixture of clays was not being made. He found a remedy, and the industry is now on a paying basis and expanding its operations.

The battle against rust in wheat and other parasites, the removal of moisture from wheat without impairing its milling and baking qualities—these and other important subjects are receiving the attention of the scientists of Canada, and their solution will mean hundreds of millions of dollars to the farmers of the Dominion.

All of which only goes to demonstrate that every industrial interest in Canada, whether it be in the manufacturing class or in the work of production from the farm, the mine, the forest or the fisheries, should strongly support the present move for larger and more extensive research work in this Dominion. And of all classes, the farmer will probably prove to be the greatest gainer.

Alberta Crop Yield

It is estimated that the crop yield for the southern portion of Alberta will amount to 40,000,000 bushels. It has been estimated that the total yield for Alberta will be in the neighborhood of 200,000,000 bushels, but some officials say that 180,000,000 bushels will be the extent of the yield.

Little did our grandparents think the day would ever come when the steering wheel would be the family circle.

New Match Company

The Columbia Match Company of Canada has taken out a Dominion charter with the purpose of acquiring control of the Columbia Match Company of Cleveland and of erecting and operating a plant in Montreal.

Bing: "What! You and your wife never quarrel?"

Wing: "Well, we haven't quarrelled for three weeks."

Bing: "How's that?"

Wing: "We're not on speaking terms."

Honor For Lost Fliers

Monument On French Coast Dedicated To Memory Of Nungesser and Coll

A monument honoring the memory of Captain Charles Nungesser and Captain Francois Coll has been dedicated at Etretat, where the French airmen left the coast of France on their ill-fated attempt to fly to New York more than sixteen months ago. It bears the inscription:

"To the First Who Dared."
At the base of the column, which resembles an obelisk, are marble figures, three times life size, representing the two fliers. The monument has been erected on the cliffs at Etretat at the point over which Nungesser and Coll in their plane "White Bird" passed on May 8, 1927, before they disappeared in the west. On the front are engraved the words: "Nungesser and Coll, May, 1927." The inscription on the reverse side recalls their attempt.

WEAK AND NERVOUS

A Condition Always Due To Thin, Watery Blood

Thin blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following case will interest those who need a tonic for the blood and nerves. Mrs. D. Veno, Union Square, N.S., says:—"With a feeling of gratitude I write to tell you what Dr. Williams' Pink Pills did for me. I had become badly run down, and reached the stage when I could not do my housework. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got a few boxes of these and soon there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I hope some other weak, nervous person will be benefitted by my experience."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Serve One Customer

Paris Store Opened For Sultan Of Morocco To Shop

One of the world's largest department stores ran full blast for just one customer recently.

Si Moulay Hemada, Sultan of Morocco, wanted to buy a thing or two and he insisted on doing his own shopping. His wish was a command to the Printemps store in Paris and for an hour, in the early evening, during the Sultan's recent incognito visit to France, everyone of the hundreds of clerks stood behind counters, scores of floorwalkers were at attention, and managers and French secret service men peered from behind piles of goods, while the young ruler, with his Grand Vizier, wandered about, buying everything that pleased his eye, leaving it for the Grand Vizier to foot the bill.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

"I wonder if that old fat girl is trying to flirt with me?"
"I don't know, but I can easily find out by asking her—she's my wife."

The Man With Asthma, almost longs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Death Of Sir Horace Darwin

Sir Horace Darwin, son of Charles R. Darwin, who wrote the "Origin of Species," died recently at Cambridge, Eng. Sir Horace, who was himself noted as a scientist, had been in failing health for some time. He had invented and constructed many delicate seismological and aeronautical instruments.

Minard's Liniment—Popular for 50 years.

W. N. U. 1753

Transform Cadillac

For Railway Service

Canadian Pacific Uses High Power Sedan For Inspection Work

A high power Cadillac sedan specially equipped with flanged steel tired wheels has just been issued from the Angus shops of the Canadian Pacific Railway at Montreal for the use of the Engineering Department of the company. Capable of travelling on the rails at as great a speed as upon the road, the machine will be used for inspection trips on C.P.R. lines throughout the country.

Service conditions are harder on the tracks for braking, and there are three systems on the car; the ordinary foot brake operating on the rear wheels, the conventional emergency brake, and a special supplementary brake applied by turning the steering wheel, acting through brake-shoes on the front wheels. The axels have been changed, the front axel being rigid and more rugged, and the rear axel, instead of being mounted in conjunction with the differential, has had the differential removed and replaced by a one-piece alloy steel axel. This is driven by a single gear with a ratio of 4 to 1, in place of the ordinary differential ratio of 1 and ten elevenths to 1.

The wheels themselves are of special design and are equipped with rubber insulation between the steel tyre and the wheel centre in order to deaden shock at rail joints, switch points, diamonds and crossovers. The lighting system, moreover, has been supplemented to comply with railroad regulations.

The car is a comfortable sedan model and will enable officials of the Canadian Pacific's engineering department to cover great distances in a short time on their inspection trips under any weather conditions. It is the only machine of the kind at this time officially in the company's service, although other smaller motor cars on rails have been improvised in other parts of Canada.

Drawback To Ocean Service

Airplanes Forced To Take Fuel For Entire Trip

Sir Eric Geddes, chairman of Imperial Airways, Ltd., states a scheme to establish an air service between England and India is now being organized, and it is hoped that within 18 months machines will be taking passengers from England to Karachi in five or six days.

On the subject of trans-Atlantic flight Sir Eric said an ocean service was not now commercially possible for whereas on the projected Empire service the machines could be re-fuelled at intervals, the trans-Atlantic flyer had to take all the necessary fuel with him.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Entertained War Veterans

Belgium Honors Badly Wounded British Soldiers

Forty disabled British ex-soldiers were recently the guests of the British Disabled Soldiers' Association, Antwerp, who asked the British Legion to select a party of the most badly wounded men in Britain for a ten days' tour in Belgium as an indication of Belgium's admiration for, and gratitude to, the British Army.

The whole of Belgium's official life was represented in this feting of British heroes, who were selected by the Legion irrespective of social standing or rank. Some were so badly disabled that the War Office had sent with the party a detachment of the R.A.M.C. to attend to them on the journey. Practically all the men had lost limbs.

Schwartz: "Vare iss you working now?"

Krause: "I'm vorking in der zink mine."

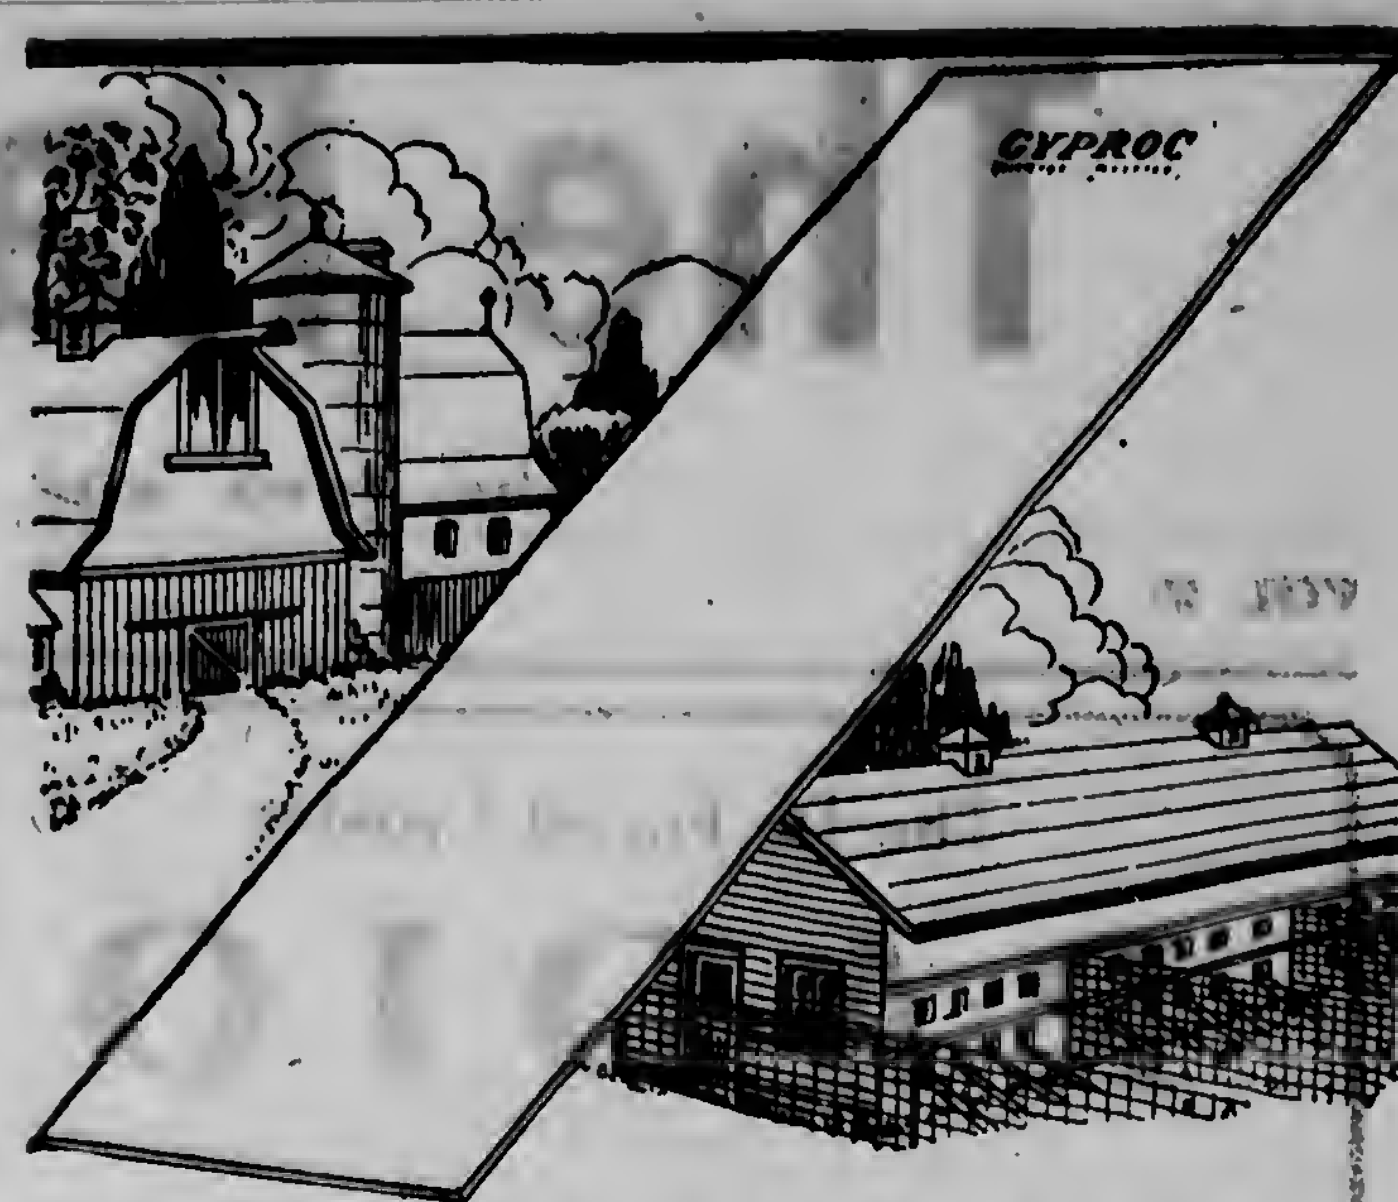

Schwartz: "Der zink mine?"

Krause: "Chess. Press one button and you come up—press anoder button and you zink!"

We reckon if a kid could choose his own mother it wouldn't take him long to make the choice between one who could bake cookies and one who always knew what kind of kid to make when she had two five-card suits.

An anti-aircraft shell, thought to be live, was unearthed by workmen excavating the roadway at Queen's Gate, Kensington Gardens, in London.

Headache? Relieve with Minard's Liniment.

"Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by Gyproc.

This famous wallboard is recommended by leading contractors for both new and old construction, because it gives advantages offered by no other material—fire-safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because Gyproc costs no more than products that have none of Gyproc's remarkable qualities.

Gyproc makes durable, permanent walls and ceilings in less time and at less cost. Gyproc Joint Filler on the joints assures a smooth, flat surface which takes any decoration—particularly suitable for Alabaster.

SEND FOR FREE BOOK
Canada Gypsum and Alabaster Limited, Winnipeg, Canada.
Please send handsome free booklet, "Walls that Reflect Good Judgment" which contains valuable information on Gyproc for farm use.

Name.....
Address.....

GYPROC Advantages for Farm Buildings

Easy to use.
Low cost.

Workable as lumber.

Cannot warp, bulge, crack, shrink or burn.

Takes any decoration.

Resists heat and cold.

Vermitt proof.

Eliminates repairs.

Protects your stock.

Ideal for lining garages, poultry houses, barns, grain bins and other farm buildings.

Especially suitable for converting attics and basements into extra rooms.

"EMPIRE"

GYPROC

Fireproof Wallboard

Radio May Control Street Cars

Radio experts prophesied a day when street cars and aeroplanes would be operated by distant radio control, following a demonstration at Chicago in which a surface car was operated by wireless from an automobile.

Ballplayer: "We gave the umpire fifty bucks to let us win the game."

Friend: "And still you lost?"

Player: "Yeah; the umpire was crooked."

A geographical mile is the length of one minute of latitude.

Humane Society Awards

The following were among the awards by the Royal Canadian Humane Association recently announced: Medals, David Johnston, Brooksby, Saskatchewan; John D. White, Vancouver; John McHugh, Yukon Territory; Margaret Martin, Waterton Lakes, Alberta. Parchment certificates, Howard Mayers, White Rock, B.C.; Mary and Victoria Barrowman, Kaslo, B.C.; and W. H. Hefner, Powell, B.C.

Happiness and misery are the names of two extremes, the utmost bounds whereof we know not.

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin;
it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. Where it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Diamond Jubilee Committee Issues Official Commemorative Medal of Beautiful Design

One of the final tasks of the National Diamond Jubilee Committee, which arranged the celebration last year of the Sixtieth Anniversary of Confederation, has been the preparation of an official commemorative medal. The records of 1867 showed that the government of Sir John A. Macdonald issued a medal commemorating the confederation of the provinces. This medal, which was designed and struck in England, showed on the obverse the effigy of Queen Victoria and on the reverse a group of five figures symbolizing the handing by Britain to the four original provinces of the pact of confederation. In designing a medal commemorating the Diamond Jubilee, the National Committee decided to show on the obverse an effigy of His Majesty King George V. and on the reverse a single figure which would in some measure represent the spirit of unity and strength which has been developed in Canada during

those of Cook and Vancouver. The whole is surmounted with the Latin motto from the Canadian coat-of-arms, "A mari usque ad mare." The National Committee is happy to acknowledge the splendid co-operation of the London and Paris mints in the production of the original dies of this medal. The dies arrived in Canada early in August and the work of striking the medal is proceeding at the Royal Mint in Ottawa. The medal is three inches in diameter—one of the largest ever handled by the Ottawa Mint. All the metal used is from Canadian mines and the medal is thus a happy combination of British, French and Canadian artistic and technical effort.

The committee has ordered gold medals to be struck for His Majesty the King, for His Excellency the Governor-General of Canada and for the Prime Minister of Canada. Gold medals will also be presented to

the last sixty years. A number of mites in working out its idea and a Canadian artist assisted the commission of Mr. C. W. Jeffreys of Toronto was finally adopted as expressing most accurately the views of the committee. The general idea conveyed by this design was afterwards translated in his own original way into medallion art by the eminent sculptor and engraver, Mr. Raymond Delannoy, of Paris, France.

Illustrations of the medal reproduced herewith show a new effigy of His Majesty King George V., which is the work of one of the foremost British artists, Sir Bertram MacKenzie. The reverse shows a figure which admirably typifies the qualities of youth, energy and confidence in the future. By its position, facing the Atlantic, from which blows a strong invigorating breeze, there is a suggestion of the cultural origins of our people and of the ideals of liberty and justice inherited from overseas. The figure stands on a pedestal bearing the dates 1867-1927. Surrounding the pedestal are sheaves of wheat and wreaths of maple leaves and in the background a map of Canada. In the upper part of which the shield from the Canadian coat-of-arms appears. On the Atlantic side of the map are the names of the first discoverers, Cartier and Champlain, and on the Pacific side

H.R.H. the Prince of Wales and to the Rt. Hon. Stanley Baldwin, Prime Minister of Great Britain, who paid a special visit to Canada in connection with the Jubilee ceremonies last year. A gold medal will also be deposited in the Dominion Archives. Silver medals will be struck for His Excellency the Viscountess Willingdon and for H.R.H. the Prince of Wales on his visit last year, for members of the Privy Council of Canada, the Lieutenant-Governors of the provinces and the Prime Ministers of the provinces. Bronze medals will be presented to senators and members of the House of Commons, to the surviving sons and daughters of the Fathers of Confederation, to members of the National Diamond Jubilee Committee and to officers of the Provincial Diamond Jubilee Committees. The medals are being struck as rapidly as possible at the Royal Mint and it is hoped that the distribution will be completed before the end of the present year.

The Rt. Hon. W. L. MacKenzie King, Prime Minister of Canada, took advantage of his trip to Europe in connection with the signing of the Kellogg treaty to present gold medals to His Majesty the King, H.R.H. the Prince of Wales and the Rt. Hon. Stanley Baldwin.

Manitoba Fisheries

Organization Meeting Held To Place Industry On a Firm Footing

At a meeting of the Manitoba Co-operative Fisheries Limited, attended by more than 100 representative fishermen from Lakes Winnipeg, Manitoba and Winnipegosis, plans were completed to place the industry on a basis where the fishermen will share to a greater extent in profits made in the business. Suggestions were made to appoint agents at Chicago and New York. Last year Manitoba produced 18,000,000 pounds of fish and those who belonged to the organization were responsible for a catch of about 7,000,000 pounds.

Among the curious regimental pets belonging to units of the British Army at different times have been a chimpanzee, an ape, a lion, a sea-eagle, a cheetah, a black bear, and a lamb.

"I read your remarkable article. In fact, I read it three times." "You flatter me!" "Not at all. Even now I don't understand it!"—Pele Mele, Paris.

W. N. U. 1753

Distinguished Farmers

Wheat Pool Includes Amongst Its Members a Prince, Baron, Duke and Countess

The Alberta Wheat Pool now includes among its members a prince, a baron, a duke and a countess. They have between them a signed-up acreage of 10,000 acres. It was stated at the offices of the pool in Calgary.

These distinguished members are His Royal Highness, the Prince of Wales, Baron Rodney, the Duke of Sutherland, and the Countess de Foras. The latter, who has a farm at High River, has just signed up a contract for 350 acres with the pool.

Human Power Plant

Psychologists Claim To Have Heard Messages From Nerves In Body

Human life has been revealed as a wonderful electric power plant and system of transmission lines.

Two experimenters in psychology say they have listened to messages flashed over the network of nerves in the human body, translating the impulses of nerve currents into sound waves that human ears can hear.

Impulses are detected by electrodes attached to the body. These nerve messages, magnified eight hundred times by a powerful amplifier, can be broadcast by wireless.

Valley Of a Thousand Falls

The name, Valley of a Thousand Falls, in the Mount Robson District, British Columbia, was bestowed by the Rev. G. B. Kinney, who first visited the region with Dr. A. P. Coleman and participated in his attempt to climb Mount Robson.

Another Classroom on Wheels Appears

Education in these days is hard put to it to keep pace with civilization although the one is dependent upon the other. In the more remote districts of Canada, in particular, the cause of culture has a struggle to survive, and were it not for modern methods the rising generation in many parts would remain untaught.

Although agricultural communities enjoy the most modern educational facilities and the "little red school house" has assumed an increased importance and has considerably en-

Co-operating with the Ontario Department of Education, the Canadian Pacific Railway has evolved the school car, and late this summer issued from its Angus Shops the second especially prepared coach for this unique purpose. It is now operating in the district in Ontario lying to the west of Fort William and Port Arthur, while its predecessor is carrying on its duties as it has for some time past in Northern Ontario in the neighborhood of Cartier and Chapleau.

The school car is equipped in every

larged its scope, other districts suffer by necessity from neglect. Outlying areas with a scattered population find inter-communication at best in summer time under the most favorable conditions difficult enough, but when winter closes down a partial paralysis is brought about. Such localities could not afford school facilities nor could permanent schools adequately serve the community, for during the winter season, children could not travel with safety. This problem, which for a number of years remained unsolved, has been met at last by a singularly practical and effective remedy, the "school car."

way like the most up-to-date "little red schoolhouse," having a "bright classroom with blackboard, regulation desks, maps, globe, school-books and so forth; a library of books for the students and adult visitors as well; and comfortable living quarters for the teacher. From the outside its appearance is that of a standard first class coach, but inside it has been entirely remodelled and especially protected and equipped to withstand the rigors of the coldest weather when left on a lonely siding.

The mobile schoolhouse solves in a unique fashion a vital and hitherto unsolvable educational problem.

Permanent Link With World

Residents of Pitcairn Island To Receive Radio Transmitting Set

Isolated since birth, except when some friendly or storm-buffed vessel chose to visit them, the islanders of the small Pitcairn Islands will soon be able to talk with the world, for a Marconi wireless transmitter which has been presented to the islanders by the Marconi International Marine Communication Company, is now on its way out there and, when installed, will be a permanent link with the outside world.

Pitcairn Island lies in the mid-eastern Pacific Ocean, and was sighted by many sailing ships in the old days. Unlike the majority of islands in this region it is without coral reefs, but rises abruptly with steep and rugged cliffs of basaltic lava.

Recently a small group of islanders learned the Morse Code, picking it up from books that had been given to them by the Marconi operators on the ships that called at the island. In 1921 they obtained a simple crystal set and five years later received a Marconi type 31 ship's crystal receiving set, but on each they can only receive.

British Settlers For B.C.

Block System Of Settlement Is Advocated By Premier

Premier S. F. Tolmie informed the Empire Parliamentary Association delegates and members of the Vancouver board of trade that the provincial government was prepared at any time to enter into negotiations for the placing of British born settlers on British Columbia lands.

"British Columbia was prepared to supply the land, administration, supervision, schools, roads, and her investment in railways," Hon. Dr. Tolmie stated.

The block system of settlement was advocated by the premier and he believed preliminary training could be given settlers in clearing settlement lands.

During the conference the feasibility of settlers going on the land in the Peace River district was discussed, but the settlement scheme embraced various sections of British Columbia.

Brandon's Broadcasting Station

Brandon's first broadcasting station has just gone into daily use, and a studio will give grain and stock reports each day, and once a week, in the evening, will broadcast local concert programmes.

The main supply of rubber comes from hevea trees of the tropics.

Mining Possibilities of Northern Manitoba and Saskatchewan Attracting Great Attention

Nine in a Line

The distinction of being the point in the British Empire from which the largest number of bushels of grain are shipped direct from farm to rolling stock belongs to Vulcan, Alberta, on the lines of the Canadian Pacific Railway. Here is a view of the local elevators, nine all told, seven of which are of double capacity. Last year Vulcan shipped two and a quarter million bushels of grain, and indications are that it will exceed its own record this year.

To Study Ancient Designs

The National Museum, Ottawa, will conduct a study of the ancient handicrafts and designs of French Canada, in order to determine the extent of their influence on the arts and crafts of the various Indian tribes. It is thought that many, if not most of the patterns in bead and silk work that appear on Indian specimens may not be aboriginal at all but copied from European patterns.

Tourists Aid Development

The tourist is often the forerunner of the homemaker and investor. He visits the country and sees with his own eyes the character of its people and resources, and if he later returns to settle or invest he is able to do both in a more satisfactory manner.

That young Canadian sprinter from the West coast astonished the world. To beat the West in anything a fellow has to be speedy.

"The drunken driver must go," says a newspaper heading. That's just the trouble. He always does go.

Young Lady: "Your novel has a charming ending."

"What do you think of the opening chapters?"

"I have not got to them yet."—Lustige Kölner Zeitung, Cologne.

Zam-Buk
FOR THE SKIN!

WORLD HAPPENINGS BRIEFLY TOLD

Old Age Pension legislation for Ontario is not likely to be enacted next year, but will be one of the government's main planks in its coming election campaign.

Baron Von Huenfeld, German filer, who stopped over at Constantinople on his flight from Germany to San Francisco, revealed that Germany is planning an air line to China.

A fitting ceremony marked the unveiling of a granite cross at Ilo Aux Condres, Quebec, commemorating the first mass ever said in Canada by Jacques Cartier, on September 6, 1535.

General Umberto Nobile has announced he would go into seclusion at the home of a friend in Naples soon to write the complete story of his recent Polar expedition.

An all-Canadian telephone service, Winnipeg to Montreal, has been established via Fort Arthur and Fort William, a distance of 1,600 miles. Heretofore, a connection between these points has been made through the United States.

The Department of National Defence, Ottawa, has placed an order with the British firm of Armstrong-Whitworth for five Siskin fighting planes to cost \$130,000. This will bring the government fighting planes to thirteen.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Automatic Gear Shifting

New Device Developed In England To Solve Motor Troubles

The London Daily Mail says that a "motoring development of first rate importance" in the form of an automatic gear-shifting device has been adopted by one of the leading British manufacturers after successful tests over 50,000 miles.

By this device a driver moves a pointer on a quadrant on his steering wheel to the desired speed designation, steps on a pedal, and the gear changes automatically, smoothly and silently.

"Well, Polly, how do you like your new teacher?"

"I half like her and I half don't like her. But I think I half don't like her."

Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicines have helped me wonderfully."

Mrs. Wm. J. Brischler, Box 143, Port Colborne, Ont.

W. N. U. 1753

WILL FILL IMPORTANT ROLE

Britain's First High Commissioner To Canada Should Be Helpful To Both Governments

Sir William Clark, who has arrived in Canada to serve as Britain's first High Commissioner to this country, will fill a very important role and one that gives promise of being valuable to both countries concerned. As Sir William himself has declared, he will serve as an additional channel of communication between the Ottawa and London governments, "two governments," he adds, "serving equally the same king and governing nations within one and the same Empire."

Britain's High Commissioner to this country should be able to offer important advice to the British Government on a number of matters that will inevitably arise. There is, for instance, the question of immigration. The question of British immigration into this country is perhaps the most important one so far as the two governments are concerned. The new British High Commissioner, who is a trained observer of all economic questions, should be helpful in solving this difficulty. He will be in a position to advise the British Government as to Canada's powers of absorption, as to just what type of immigrant this country requires; indeed he should be in a position to advise with accuracy, and with a full knowledge of all aspects of the situation, both the British and Canadian Governments on this important question. In fact, it is just possible that this new link between the two countries which has been created is just what is necessary to render a problem no longer a problem.

On other matters, too, Britain's High Commissioner to Canada should be of distinct service. Sir William Clark gives promise of being an ideal man for the post and Canada will welcome him heartily to her shores.

An Interesting Collection

Figureheads Of Old Warships Can Be Seen In England

At Castle's Yard, Millbank, England, is preserved the most complete collection of figureheads of old wooden warships some of them dating back to Nelson's time extant in England today.

Here may be seen figureheads from the Hood, Cressy, Bristol, Collingwood, and many other famous ships, carved out of timber and painted and gilded by men who were artists in their craft.

One very fine example is the Highlander that once belonged to H.M.S. Edinburgh. Another is a gigantic head of the Duke of Wellington, measuring nearly four feet from forehead to chin. The ship which this adorned was launched on the day the Iron Duke died. Another interesting exhibit came from the Fighting Temeraire, Turner's famous picture of which hangs in the Tate Gallery near by.

NEW BEAUTY FOR YOUR CLOTHES By Mae Martin

You can look attractive and stylish on less. Learn how to give new beauty and variety to your dresses and add individuality and charm to things around the home by the quick magic of tinting and dyeing. Perfect results are possible only with Diamond Dyes. Each package represents the perfection of 50 years of dye-making. They never streak, spot or run. They are real dyes, like those used when the cloth was made. Diamond Dyes are easy to use. The "know-how" is in the dyes. Fashionable tints appear like magic right over the out-of-style or faded colors. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

British Columbia Apples

Will Be Marketed In New Way From Coast To Coast

British Columbia apples are now going to be marketed in an up-to-date way from coast to coast in all the larger cities of Canada, it is announced by W. McL. Cooper, general manager of the Eden Apple Service, a subsidiary of the Associated Growers of the Okanagan, following meetings with Victoria and Vancouver wholesalers. Under the new plan British Columbia apple service stations will be established in all the chief cities where apples will be kept cool and in best condition. British Columbia apples will be distributed from these stations in a new style, half dozen and dozen cartons for the small buyer. All selling will be done through retailers, who will be supplied daily.

Seed Cleaning Station

New Government Station At Saskatoon To Be Ready For 1929 Crop

Dr. J. H. Grisdale, Deputy Minister of Agriculture at Ottawa, following a visit to Saskatoon, stated that it was the intention of the Federal Government to establish shortly at the latter city a seed cleaning station similar to that operated at Moose Jaw, and that he hoped the new station would be operating in time for the farmers to take advantage of it for the 1929 crops.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Our National Buffalo Herd

Buffalo National Park, with its area of 197.5 square miles, is the home of Canada's national buffalo herd, there being a little over 5,000 of these animals now in the park. Moose, elk, mule deer, antelope and yak are also in the park.

Among the arms, munitions, etc., which Germany has either handed over to the Allies or destroyed are 14,000 aeroplanes, 315 submarines, 83 torpedo boats, 6,000,000 rifles and small arms and 107,000 machine guns.

Blentfuit Lignite Coal

Approximately half a million tons of coal were produced from the Blentfuit lignite coal fields last year, and it is expected that a similar amount will be dug during the coming winter months.

The Peace River

Success Being Achieved In All Branches Of Agriculture

The eyes of agriculturists are now turning to the Peace River country, where the winters appear to be comparatively mild, and where wheat, oats, and timothy seed can be grown and take prizes in world competition. In this wonderful stretch of country often by the middle of April the winter grains and grasses are greening, and the first week in May sees the tulips and hyacinths in full bloom.

Summer temperatures range around 90, and though early frosts are at times experienced, harvesting is usually well in hand by the first week in September. Some splendid wheat yields were reported a year ago in the Grande Prairie and Valhalla districts running from 42 to 70 bushels to the acre.

The work done on the Beaverlodge Experimental Sub-Station is fully set forth in the report of that station which is available for distribution and may be had on application to the Publications Branch, Department of Agriculture, Ottawa. The Peace River country is developing very rapidly, and the agriculture practiced is very diversified. Success is being achieved in all branches including grain, dairying, poultry and bee-keeping.

Externally or Internally, It Is Good.—When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

British Harvesters And Red Cross

In War And Peace The Red Cross Is Still Serving

"Ready for service" is the proud boast of the Red Cross the world over, and in countless ways, unseen by the man in the street, the Red Cross is found to be "still serving."

A large party of British harvesters in the west found themselves stranded in the city of Calgary. Their immediate need was shelter for the night and the friendly hand. Cool weather and early frost necessitated the provision of warm bedding for these strangers within the gates.

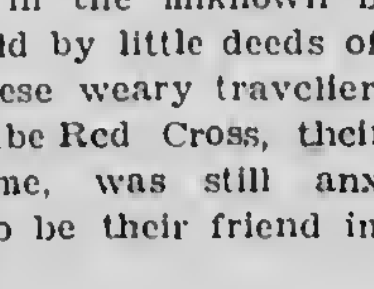

The Red Cross of Alberta gladly came to the rescue and was able to co-operate with the Salvation Army in the problem of getting the men comfortable for the night, by supplying each and all with warm bedding.

Thus in the unknown byways of the world by little deeds of kindness were these weary travellers reminded that the Red Cross, their friend in war time, was still anxious and ready to be their friend in times of peace.

SUMMER COMPLAINT

Nearly Lost Her Little Girl

Mrs. Theodore Livett, Anthony, Ont., writes:—"Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

People seldom improve when they have no model but themselves to copy after.

and after she had taken a few doses she was relieved. I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

SUNDAY SCHOOL LESSON

OCTOBER 7

PAUL IN EPHESUS

Golden Text: "We are His workmanship, created in Christ Jesus for good works, which God afore prepared that we should walk in them."—Ephesians 2:10.

Lesson: Acts 19:1-41; Ephesians 4:16.

Devotional Reading: Ephesians 3:14-21.

Explanations And Comments

The Forfeited Chance, Acts 19:8, 9.—On his third missionary journey Paul came to Ephesus, where he followed his customary method of speaking first to the Jews, and then to the Greeks. For three months in the synagogue he reasoned and persuaded as to the things concerning the Kingdom—the subject of Jesus' teaching. But instead of heeding his message, the Jews hardened their hearts, and some of them even spoke evil of "the Way" (used as a synonym for Christianity; recall Acts 9:2). Paul was obliged to break with the Jews, leaving the synagogue for the lecture-room of Tyrannus, where many of them followed him. Tyrannus was probably a Gentile who had a school of philosophy. Paul may have seemed to the Ephesians to be one of the wandering professors of philosophy who were so numerous in the early Empire. In the lecture-room of Tyrannus, from eleven to four, after that philosopher had finished his lectures, Paul proclaimed unto his hearers Jesus the Christ.

Two Fruitful Years, Acts 19:10.—For two years Paul continued teaching in the school of Tyrannus, and "all that dwell in Asia heard the word of the Lord, both Jews and Greeks." Within easy reach of Ephesus were the other cities of the Roman Province of Asia (on the western shore of Asia Minor). During these years were probably found the others of the Seven Churches of Asia of Revelation 1:4, 11.

Many of the converts who had practised magical arts came and, publicly renouncing their deeds, brought their books and burned them in the sight of all. "These were books of formulae for compelling the assistance of spiritual beings, or securing the affections of a beloved, or for inflicting pain and spiritual torment."—A. S. Peake. The net destroyed property valued at fifty thousand pieces of silver, or the customary pay for fifty thousand days' labor. Probably there were few copies of the magicians' scrolls, and to their rarity was due their valuation.

Recipes For This Week

(By Betty Barclay)

ORANGE CUSTARD (Serves 7)

- 2 cups Borden's St. Charles Milk.
- 1 cup hot water.
- 8 tablespoons cornstarch.
- 3 eggs.
- 1/4 teaspoon salt.
- 1/4 cupful cold water.
- 1/2 cup orange juice.
- 2 tablespoons lemon juice.
- Grated rind of one orange.
- 1 cup sugar.

Mix cornstarch, sugar and salt, dilute with cold water. Add to scalded milk and hot water, stirring constantly until mixture thickens, afterwards occasionally; cook fifteen minutes. Add orange juice and slightly beaten eggs that have previously been mixed; mix thoroughly and lastly, add the lemon juice and orange rind. Cool and serve.

CARAMEL CUSTARD (Serves 6)

- 1 tall can Borden's St. Charles Milk with enough water to make 1 quart.
- 5 eggs.
- 1/2 teaspoon salt.
- 1 teaspoon vanilla.
- 1/2 cup sugar.
- 1/4 teaspoon nutmeg.

Gradually sift sugar into a hot skillet, shaking the skillet vigorously all the time to prevent burning. The sugar should melt about as fast as it is sifted into the pan. When it turns to an amber color (a light resin color) set on back of stove and add milk, being careful that milk does not bubble over, as is liable on account of the high temperature of sugar. As soon as the sugar is melted in the milk, add mixture gradually to eggs slightly beaten. Add the salt and flavoring to egg and milk mixture. Bake in custard cups in a moderate oven.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Will Continue Confederation Train

As a result of the great increase in winter travel between Ontario and the prairie provinces, the "Confederation," the Canadian National Railway, passenger and express which now runs between Toronto and Vancouver, linking these cities with Brandon, Regina, Saskatoon and Edmonton will operate as far west as Edmonton until January 5.

Each of the continents has one or more towns bearing the name of Rome.

WHITE STAR LINE CANADIAN SERVICE

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE TOOTH "NERVE"

You know, of course, that a tooth is not solid right through, but is hollowed out in the centre to form a chamber; and because of sad experience perhaps in a dental chair, you have been made aware that a tooth does possess a "nerve."

But you gave no thought possibly as to whether this chamber contained other forms of tissue or not.

Now, as a matter of fact, it does, and the so-called "nerve" is known as the pulp, which tissue is a mass of almost gelatinous character containing minute blood vessels and nerve filaments.

So it is not just a glistening string like piece of nerve tissue as you may have supposed.

When the tooth erupts, the pulp chamber is proportionately large, but with the tooth practically fully formed, the need for tissue forming elements is largely past. So the blood supply is cut off more and more with a progressive narrowing of the pulp chamber, until in advanced life, it is sometimes altogether obliterated.

This accounts for the fact that tooth decay can more quickly do great havoc in the child's tooth than in the adult's.

You draw the dental engine, and at the first touch of the "drill" to the tooth, you are sure the dentist has struck the nerve because of the pain produced.

However, this sensation is being carried merely by minute fibrils that lie in the dentinal structure, while the pulp containing the nerve proper has gone undamaged.

Remember this: that the power of healing in the pulp is very low and once infected, the chances of its recovery to health are extremely slight.

For which reason you should be on your guard to head off tooth disease in its earlier stages.

"What sort of face powder does your mother want, my girl?"

"Anyfink wot will cover up a black eye, sir."

British Ship Seized And Officers Murdered By Chinese Pirates

Hong Kong.—A story rivaling the tales of the Spanish Main was brought to Hong Kong Saturday by the steamship Anking, which reached port after having been looted by Chinese pirates.

Two British officers of the steamer, Chief Officer David C. Jones of New Quay, Wales, and Chief Engineer Henry Thompson, of Greenock, Scotland, were killed. Captain Plunkett Cole, who commanded the ship, was wounded, as was Third Officer A. I. Campbell. The Chinese quartermaster, who rushed to the bridge to fight off the pirates, was shot dead.

The Anking, which left Singapore, Straits Settlements, on September 22 for Hong Kong by way of Hoihow, Swatow and Amoy, was attacked by the pirates on Wednesday in the Gulf of Tonking. The pirates had shipped aboard the vessel as passengers, a method of robbing vessels frequently practiced in Chinese waters.

Most of the officers of the ship were at dinner Wednesday when the pirates, numbering 40 men, dropped their passenger roles. Some of them rushed to the bridge of the vessel, firing point-blank at the officers on duty there. Chief Officer Jones was instantly killed and Captain Cole fell with bullets in both legs. It was at this point that the Chinese quartermaster rushed to the bridge to assist his commander but was shot dead as soon as he appeared.

Meanwhile other pirates had rushed into the engine-room and murdered Chief Engineer Thompson. The other officers were wounded and beaten with clubs, while Campbell was knifed in the back and fell beside the body of Chief Officer Jones.

The pirates seized the ship's armory and took full control of the vessel, overhauling the 1,400 passengers aboard her.

After throwing the dead men overboard, the pirates permitted the ship's surgeon to dress the wounds of Captain Cole and the others who had been wounded. Second Officer Bennett was then forced to navigate the ship under guard of pirates who held revolvers at his back. Bennett was compelled to stay on the bridge for 54 hours with short intervals of rest until the Anking cast anchor in Honghai Bay, which is north of Bias Bay, the notorious lair of Chinese pirates.

All the passengers were mustered on the decks and systematically searched, luggage and cargo cases were ransacked and the ship's offices were robbed. For ten hours this went on until a great pile of loot was heaped on the decks ready to be taken ashore.

The pirates disembarked in three lifeboats, taking loot valued at \$80,000 Mexican. Seven Chinese passengers also were taken along to be held for ransom.

Chinese Soldiers Face Starvation
Shanghai, China.—Generals of the Nationalist army notified Nanking headquarters that 100,000 soldiers are in danger of starving to death in the Chihli vicinity. The message also said the villagers were suffering from lack of food and soldiers were not provided with boots or blankets.

Air Mail Service Starts
Toronto.—Daily air mail service between Montreal and Toronto, and an international service between Montreal and Albany, N.Y., started October 1.

Declares Canada Is Making Every Effort To Bring Britishers Here

Winnipeg.—That there was no foundation for the charge made by Bishop Lloyd of Saskatchewan at a luncheon here "that there has been and is today a deliberate attempt to keep the British out of Canada," was the declaration made by Hon. Robert Forke, minister of immigration.

Speaking over the long distance telephone from his farm at Pipestone, Minn., Mr. Forke said: "We are doing every thing possible to bring to Canada Britishers whom we think are willing and capable of working on Canadian farms, no matter what district they come from."

"We are paying, with the help of the British Government and the

Seaplane Is Complete Wreck

But Valuable Engine In Major Godfrey's Machine May Be Salvaged

Edmonton.—With their huge seaplane wrecked when it crashed in a smoke bank on the Peace River, Major E. A. Godfrey, and his three companions had a narrow escape from death. The crash and the escape of the crew was described by Wing Commander L. S. Breadner and Wing Commander Lindsay Gordon who arrived here from the north. The fourth man in the seaplane at the time of the crash was Sgt.-Major Graham.

The huge plane crashed into 25 feet of water and the crew barely escaped drowning. It is understood that although the plane is wrecked, an attempt will be made to salvage the valuable engine.

Will Make Second Attempt Next Year

American Pilot Stranded On Flight To Stockholm Via Greenland

Copenhagen.—Bert Hassell, American flyer, who arrived here from Greenland with his trans-Atlantic companion, Parker Cramer, announced he would make another attempt next year to fly from the U.S. to Stockholm by way of Greenland. Hassell and Cramer, who were rescued in Greenland after having been stranded in the Arctic wastes, arrived at Copenhagen aboard the steamer Fulton.

They were accompanied by Prof. William H. Hobbs, leader of the University of Michigan Greenland expedition, which had brought them to safety.

Withdrawing From League Of Nations

Argentine Parliament Is Discontinuing Appropriations To Meet Dues
Geneva.—Argentina intends to withdraw from the League of Nations, it was indicated by advices from Buenos Aires stating that the Argentine parliament had decided to discontinue appropriations to meet league dues.

The news caused surprise and consternation in league circles. It was pointed out that the Argentine decision is tantamount to withdrawal as no nation may remain a member of the league unless the financial obligations are met. Under the rules of the league any member nation that contemplates withdrawal must pay dues for two years after notification of withdrawal is given.

Canada Will Be Represented
Ottawa.—Canada will be represented at the International Air Conference, which takes place in Washington in December. This was stated officially at the Department of National Defence. Canada's representative has not yet been selected but an announcement with respect to the selection will be made later. The conference has to do with civil aviation.

Mayor Of Cardston Dead
Lethbridge.—Mayor Mark Spencer, Cardston, pioneer and eight times chief magistrate of that town, died recently at Rochester, Minn.

Alleged Absconder Caught

Clinton S. Carnes Wanted In Atlanta, Apprehended In Winnipeg
Winnipeg.—Search for Clinton S. Carnes, wanted in Atlanta, Ga., in connection with shortages of his accounts as treasurer of the Southern Baptist Home Mission Board, ended in Winnipeg, when he was arrested on the street by detectives of the city police.

Indictments against him charging embezzlements may total approximately \$2,000,000. He has waived extradition. Carnes has been sought by world-famous detective agencies of two continents since the hunt for him began Sept. 5.

Carnes admitted his identity and was at once taken to the city police station and locked up.

Chief of Police Chris H. Newton said that he will be remanded to await an escort from the southern city. His arrest is one of the biggest coups ever effected in the history of the Winnipeg police force.

The arrest of Carnes came about through information from a person whose identity the police refuse to divulge, that a man, believed to be Carnes, was in the city. The informant is believed to be a woman. That was ten days ago and the police have been shadowing him ever since. They got in touch with the Pinkerton Detective Agency in Chicago and obtained a picture, finger prints and enough other data to convince them that the man under observation was Carnes.

Attending University Of British Columbia

Percy Williams Will Take Freshman's Course In Vancouver

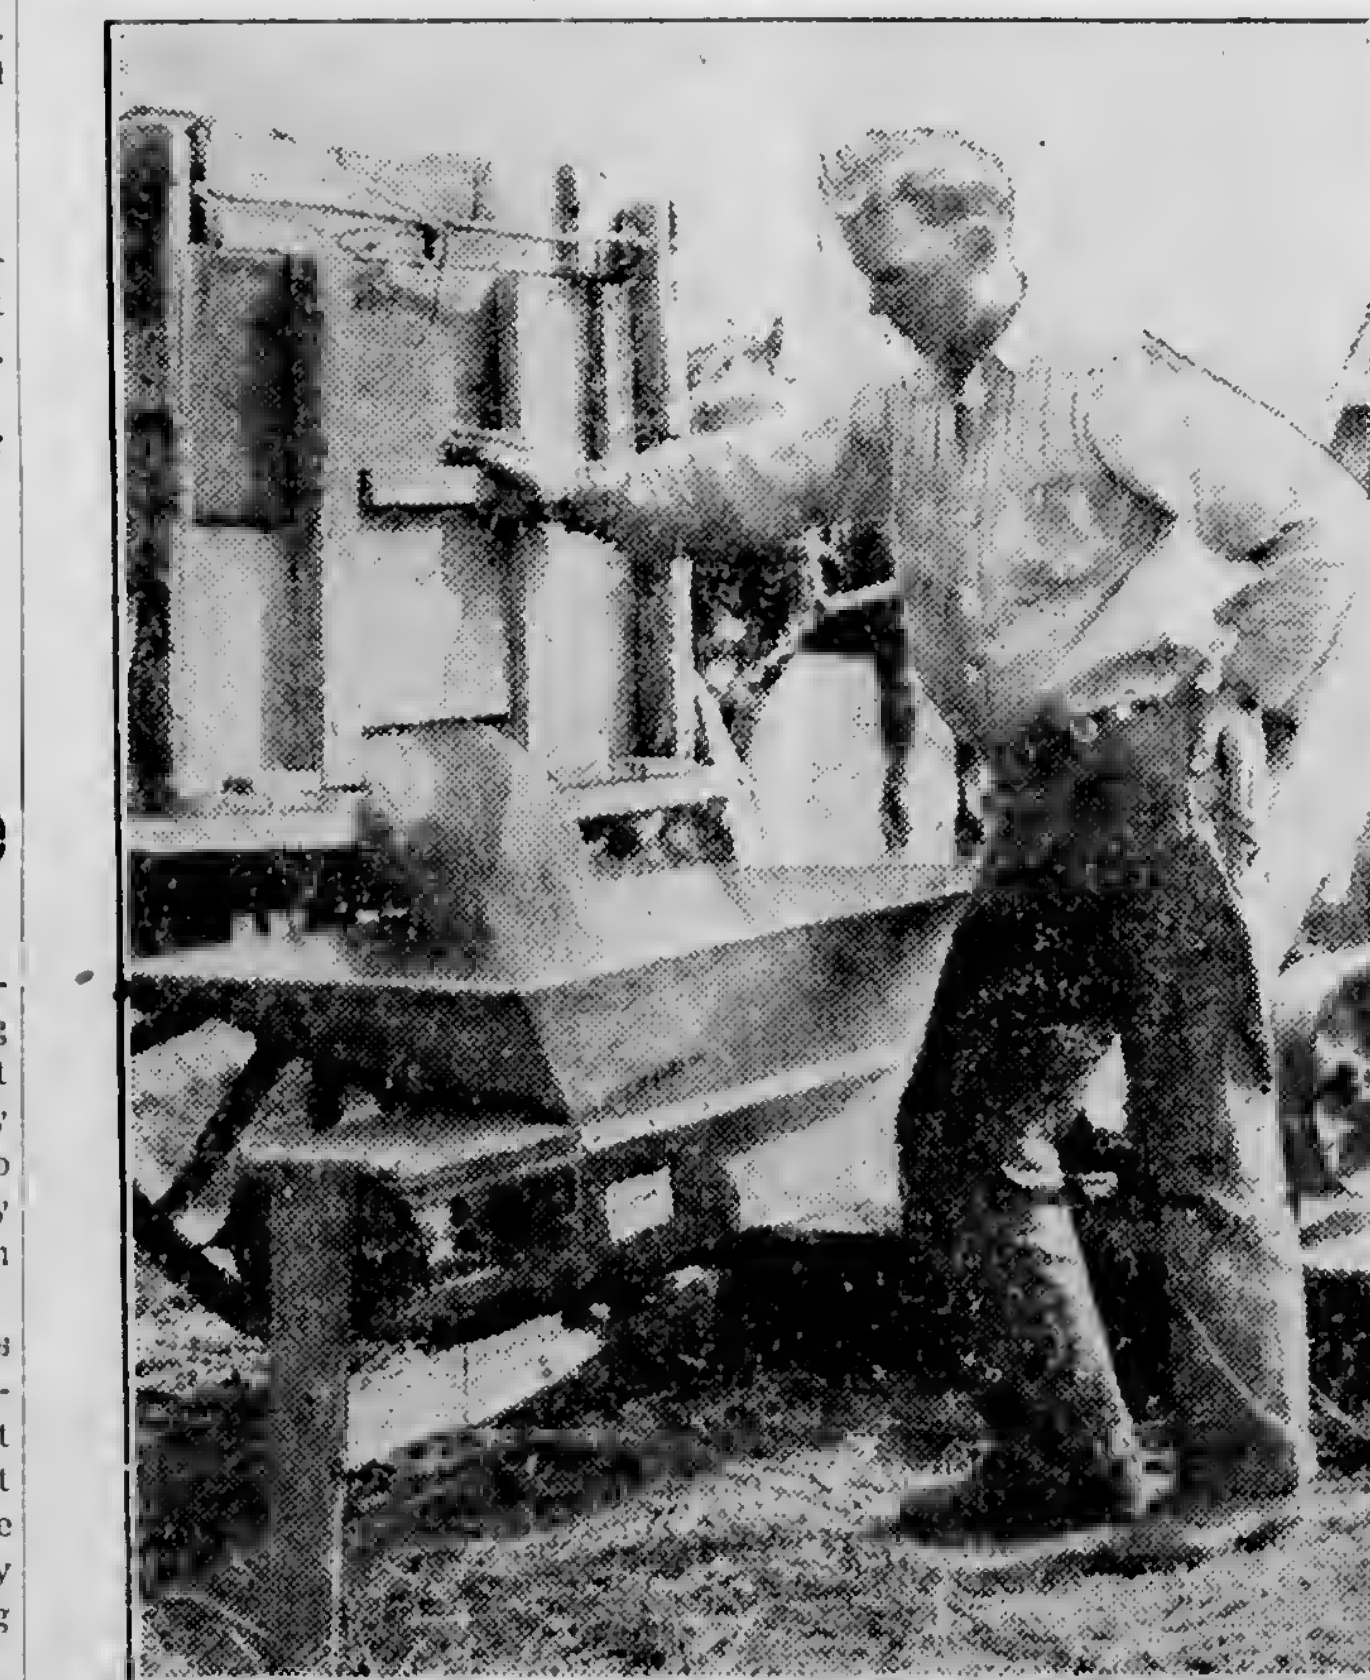

Vancouver.—Percy Williams, Olympic 100 and 200 metre champion, will attend the University of British Columbia here, for one year. After that he will take the business administration course at the University of Washington. This was decided at a meeting of members of the committee in charge of Williams' affairs here, which Williams attended.

Williams spent two days in Seattle and returned home in order to discuss all angles of his situation with his friends here. He had been invited to attend the Washington institution.

"He is remaining in Vancouver for the year because he feels that it would be unfair to those who welcomed him so wonderfully and who have been so good to him to leave," a member of the committee said.

Gate Receipts Cover Expenses
Montreal.—Quite contrary to all expectations and customs, the Olympic games at Amsterdam paid for themselves this year. This was learned in an announcement made by the Netherlands consulate here. Official figures are lacking, but it is understood that gate receipts will pay for all monies advanced the Dutch Olympic committee by the government and individual subscription.

Support For Gov. Smith
New York.—Representative Mary T. Morton, Democrat, New Jersey, in an address broadcast from here, appealed to women to vote for Governor Smith, whom she termed "the greatest humanitarian this country has ever produced."

E. Philpott, British harvester from Liverpool, England, at work in a farming field of Vulcan, Alta.

Director Of Cancer Research

Dr. Ellice McDonald, shown above, who believes that he can forestall cancer by treating the subject through the administration of thyroid gland extract and other means. Dr. McDonald is director of cancer research at the University of Pennsylvania and the Philadelphia General Hospital. Dr. McDonald is a Canadian who had his early education at Winnipeg and finished it in Toronto. He has three brothers, Brig.-Gen. H. F. McDonald, C.M.G., D.S.O., of Winnipeg; D. H. McDonald, M.P.P., of Qu'Appelle, Sask., and F. A. McDonald, Winnipeg.

Will Analyze Frosted Wheat

Scientists At University of Saskatchewan Have Started Work

Saskatoon, Sask.—Now that four Canadian scientific laboratories, including that of the University of Saskatchewan, have determined that milling and baking qualities are not lessened by toughening or dampening of grain, scientists here, in collaboration with the investigations carried on elsewhere in Canada, are turning their attention chiefly to frosted wheat.

With painstaking effort as to detail, the Saskatchewan University laboratory, under general supervision of Dr. T. Thorvaldsen, professor of chemistry, and direct supervision of Dr. R. K. Larimer, has begun work with the object of determining the actual damage done by frost to the milling and baking quality of wheat.

Forty Killed By Explosion

Powder Magazine In Old Spanish Fort Caused Accident

Melilla, Morocco.—By an explosion of the powder magazine of the ancient Spanish fort of Cabrerizas Bajas forty persons were killed and 200 injured, some of them probably fatally. The explosion demolished the old citadel, on a rocky hill overlooking the town. All houses around the citadel were destroyed.

Women and children were among the dead and injured. Nine soldiers of the Spanish garrison at the fort were killed. The government appropriated 25,000 pesetas (\$4,125) for relief of the families of victims.

Enters Novel Plea
Detroit.—A plea that he was walking in his sleep when he shot and killed his wife, Amelia, has been entered as a defense for Chester Kutzbach, 48, on trial here charged with murder.

Says Canada Is Most British Of All The Dominions

Funds Not Forthcoming

Byrd's Expedition To South Pole Faces Heavy Deficit

New York.—Commander Richard E. Byrd's South Polar expedition faces a deficit of \$200,000, the Commander said in a statement to the New York Telegram.

With two ships already on their way, Byrd himself has been forced to resort to collecting the funds subscribed to the project before leaving, he said. Even then, the money has not been forthcoming as expected.

The Telegram quoted Byrd as saying that because of failure of the expedition's backers to furnish the remainder of the needed funds, the Commander has had to desert other pressing eleventh hour work to aid in collecting the money.

Byrd's disclosure of the financial status of the project was made in answer to a query regarding the purpose and scope of the expedition.

"The expedition is purely for the advancement of science and the prestige of the United States," the Commander said.

Does Not Need Warships

South Africa Protected By British Fleet, Says General Smuts

Capetown, South Africa.—Speaking to an audience which was predominantly of Dutch origin, General Jan Christian Smuts, leader of the opposition in the assembly, was vigorously applauded in a memorable speech on the secession question.

General Smuts at one point declared: "If we were not within the empire we would have to go to America or France, or some other big country to protect us because we are not safe. One warship could bring us to our knees. But today we are not considered in a kraal. We are in a friendly circle with a powerful British fleet to help us if any injustice is planned toward us."

"We need not spend millions on a fleet," General Smuts continued, "but can concentrate on projects of development so necessary to a young country. The British Empire is not a bond tying us, but she is a helping hand."

Expresses Sympathy For Florida Sufferers

King George Cabled Condolences To President Coolidge

London.—That King George takes a keen interest in world affairs is evidenced by the cable sent by him to President Coolidge, expressing his sympathy to the people of the U.S. for the sufferers in the Florida hurricane.

The message read: "I desire to express to you and through you as kind intermediary to the American people, my sincere condolences upon the disaster which has recently overwhelmed Porto Rico, the Virgin Islands and the state of Florida as a result of the recent hurricane and my sympathy with all those that have suffered from its effects."

Argue Question Of Provincial Rights To Water Powers

Ottawa. Dominion and provincial rights to water powers will be argued in the supreme court of Canada next week. Recognized as one of the most important questions with far-reaching ramifications which has come before the courts in years the matter undoubtedly will be carried to the Privy Council in England for final adjudication.

Development of the potential water powers of the St. Lawrence, international and interprovincial in character, development of water power on the Ottawa river and a number of other power projects, all these are vitally concerned in the points to be decided respecting Federal and provincial jurisdiction. The case probably will extend over two weeks.

The Dominion government and at least five of the provinces, Ontario, Quebec, Manitoba, Saskatchewan and British Columbia, will be represented.

Toronto.—Lord Melchett, industrial and financial leader in England and promoter of the "Peace in Industry" movement, arrived in Toronto recently from New York on a tour of inspection of his extensive interests in Northern Ontario. The former Sir Alfred Mond is interested in the Mond Nickel Company and while the main object of his visit is business, he is also keenly interested in the promotion of closer ties between Canada and the Empire.

His statement to the Canadian people on his arrival on this subject was: "It seems to me you should have more British immigrants because we must keep Canada British. There is not a more British dominion in the Empire."

His lordship advocated land grants by the Canadian government as a solution of Britain's unemployment problem. He endorsed also the views of recent British visitors upon the adaptability of British miners to agriculture. He did not believe there would be great difficulty in making Canadian farmers out of these British miners because so many of them work in the British harvest fields during the summer months.

Unemployment insurance with a scope embracing the whole empire, elimination of the superfluous red tape which annoyed British immigrants in Canada and a scheme whereby 50,000 persons at a time would be brought into Canada were advocated by Lord Melchett.

On the subject of the rumored Nickel merger, his lordship said that there could be no big development for some time.

Post Office Robbery

Bandits Seize \$1,600 In Raid In Southern Saskatchewan

Estevan, Sask.—Bandits descended on Steelman and Hirsch shortly before nine o'clock at night and secured loot amounting to \$1,600, part of which is in grain cheques. There were four men travelling in a Buick closed car, all masked and carrying revolvers.

Besides taking the money at two places, one of the men fired two shots after M. F. Billington, postmaster at Hirsch. They made a clean getaway.

Police at Estevan were immediately notified but the robbers got away too fast and before the trail could be picked up, the men were believed to have crossed the international boundary line.

Decline In Unemployment

Stockholm.—Unemployment is on a steady decline in Sweden. Latest government figures, just released, show that the number of people out of work who applied for aid in July was 9,500 as compared to 11,169 in June, or a decrease of about 14.9 per cent.

Peking.—More than 2,000 Chihli-Shantung soldiers have been killed opposing the Nationalists northeast of Tien Tsin, says the Kuenin news service, reporting the surrender of the former Northern army.

West Adapted For Honey Industry

Bees Are Free From Disease And Not Harmed By Cold

Beekeeping in Saskatchewan is fast becoming more than a side line. By the end of this year, there will be 50 per cent. more beekeepers than there were last year. Roy M. Pugh, official in the field crops branch of the provincial department of agriculture, is authority for the statement. He has returned from a six weeks tour which took him south to the border and as far north as Nipawin, where there are many colonies of thriving bees.

Last year there were 928 beekeepers. There are 1,140 now registered. By the end of the year there will be 1,500 at least, he says. Honey last year sold around 11 cents a pound, although prices varied in different localities and with outside production. There were at least three beekeepers in the province who produced last year in excess of 7,500 pounds of honey. They did it as a side line. One man, resident in rural Saskatchewan, is about to produce honey on a commercial scale as a means of livelihood.

At the present time, the average is five or six swarms of bees per beekeeper in the province although many apiculturists have in excess of 100. Statistics show that those who had a few swarms a year ago are increasing the number greatly.

All of which shows bees are useful for other than their sting. This year the field crops branch showed Saskatchewan honey at the exhibition, bottled in various sizes. As an expert, it obtained the permission of the Saskatchewan Beekeepers' Association, who put on the exhibit, to distribute the honey through stores and restaurants in Regina. The way the honey has since disappeared has made the beekeepers' association wish it had more bottled up to distribute.

Wheat 40 Bushels To Acre

Good Yields Of Wheat Are Reported In Saskatchewan Area

Among the first wheat shipments this year from the Saskatchewan district were those from two farmers at Houghton, each of whom recently hauled 10,000 bushels to one of the large elevators at Saskatoon. This wheat graded No. 1 Northern and was harvested from fields that averaged 40 bushels to the acre.

Another farmer from northwest of Saskatoon trucked several thousand bushels to the elevator here, all of which was given the top grade.

The Canadian Government elevators are receiving their first wheat from the Saskatchewan district. Two farmers, whose farms are near the elevator, hauled wheat to it from fields that yielded an average of 35 to 40 bushels to the acre.

Bumper Apple Crop

This Year's Crop Estimated To Be Largest Since 1923

The commercial apple crop of Canada this year is estimated at 3,157,260 barrels, the largest in any year since 1923. The increase is in British Columbia where the crop is some 37 per cent. bigger than in 1927. The crop is smaller in Nova Scotia by 4 per cent., New Brunswick 20 per cent., Quebec 2.2 per cent., and Ontario 1.3 per cent.

According to the Canadian Government Bureau of Statistics the 1927-28 average crop is 3,105,545 barrels, which places the 1927 crop 51,515 barrels above the five year average.

The potato average of 551,300 acres indicates a two per cent. increase over 1927.

Lady (engaging servant): "And do you have to be called in the morning?"

Applicant: "I don't have to be, ma'am, unless you happen to want me!"

"Are you the man who boxed my ears yesterday?"

"No."

"You are not?"

"No."

"Then who are you?"

"The man who is going to box your ears today." Buen Humor, Madrid.

W. N. 17, 1753

WORKING ON CORRECT HISTORY OF GREAT WAR

Clemenceau Will Probably Leave The Best Record For Future Generations

The histories of the Great War and the unprinted legends of the conflict are "all wrong" and the principal French actors in the four years' drama of the western front are writing their versions of events for posterity.

One outstanding character in the struggle is living in a little fisherman's hut in Vendee. He prefers not to be molested and spends most of his time walking in the garden or leaning in his study scratching away with his pen. Surrounded by his books and his memories, "The Father of Victory" is touching up his account of the war and Georges Clemenceau probably will leave the greatest record for future generations.

In another retreat this time in Brittany Marshal Foch is poring over scraps of writing, papers, his war maps and notes. In time, he will start writing and from the rugged coast near Morlaix will come the impressions and the revelations of the Allied commander.

Marshall Joffre has just concluded his life story which was written at his pretty country home above the Seine at Louveciennes. Embittered by ten years of criticism and angered by the efforts of many war writers to shift the responsibility for the French retreat in early days of the war to his shoulders, Joffre may publish parts of his memoirs.

"So many errors have been printed in histories of the war," he said. "The published stories of the first battle of the Marne are nothing less than fiction, and many other phases of the war have been erroneously recorded by historians."

"I wrote the story of my part in the war as carefully as I could, destroying untruths with truths and using facts to replace fiction. I have documents to prove everything I asserted. I hesitate to publish my memoirs because there is no use in starting a controversy. But I may be obliged to publish chapters, now and again, just to put historians right."

Gallieni, hero of the Oureq, who sent the Paris taxicab fleet out to join the army on the heights of Meaux, died before his memoirs were well started. He could have told much about the feat of turning a retreating army in its tracks to whip the over-confident foe.

Eskimos Are Polite

Never Punish Their Children, As We Do, and a Province that does not They Believe That They Are Reincarnated Ancestors

The Eskimos of Greenland never punish their children, because they believe them to be reincarnated ancestors. An Eskimo's son may be his dead uncle, or a cousin, or even his father, re-born in a new shape. They are never scolded, let alone spanked. Furthermore, the Eskimos are the most polite people in the world.

William Thalitzter, of the Royal Danish Academy of Science, who spent many years in Greenland studying the lives of the Arctic dwellers, so told the International Congress of Americanists meeting in its twenty-third biennial convention at the American Museum of Natural History.

"The Eskimos are so close together," he explained, "that they have developed an elaborate anxiety of address in order to eliminate frictions among themselves."

Why He Was Remarkable

"William," asked the teacher, "can you tell me who George Washington was?"

"Yes, ma'am, he was an American general."

"Quite right; and can you tell us what George Washington was remarkable for?"

"Yes, ma'am, he was remarkable because he was an American and told the truth."

Household Science Degree Course

Details of a four-year degree course leading to the degree of Bachelor of Household Science have been announced by the University of Saskatchewan. Instructions in household science has been provided for some time, but this will be the first year that a degree course has been on the curriculum.

More than 400 persons have died during the past month in Athens from dengue fever. Total cases exceed 250,000. In other Greek towns and cities there are hundreds dead.

"What kind of a party was it?" "Well, at about 1.30 the automatic fire sprinkler started to work."

Meal Mixtures For Steers

Screenings and Oil Cake Proved To Be Best Most Satisfactory

An experiment conducted at the Lennoxville Experiment Station, shows that a mixture of 60 per cent. screenings and 40 per cent. oil cake makes one of the most satisfactory meal mixtures for steer feeding. Four lots of steers were used, six to a lot. Those fed screenings made an average daily gain of 1.86 pounds; the second lot given 60 per cent. screenings and 40 per cent. corn, gained 1.84 pounds per day; 60 per cent. screenings and 40 per cent. cottonseed produced a gain of 1.99 pounds; and the screenings and oil cake a gain of 2.12 pounds per day.

The gain produced with the cottonseed was lowest in cost at 7.1 cents per pound of gain, and the corn the highest 7.79 cents per pound of gain. The screenings and oil cake cost 7.27 cents, but when the bulk of the steers is taken into consideration, which is estimated at half a cent a pound over the other lots, the results showed that this mixture makes one of the most satisfactory mixtures for steer feeding. Full details of this experiment are recorded in the report of the Lennoxville Experiment Station which may be had on application to the Publications Branch, Department of Agriculture, Ottawa.

It is interesting to note that the steers in this experiment each consumed 1,740 pounds of hay, and 5,220 pounds of ensilage.

Napoleon's House Is Interesting Museum

Has Been Officially Recognized As An Historical Monument

The Napoleon's Museum, which is latest of France's historical monuments to get official recognition, has been inaugurated by Edouard Herriot, minister of public instruction, at the Ile d'Aix in the house occupied by the emperor immediately preceding his exile to St. Helena.

The house had been purchased and restored by Baron Gougard, great-grandson of the general who accompanied Napoleon into exile. The baron founded the Society for the Preservation of Historical Relics.

The house contains the last bed in France which the emperor slept in, and the authentic draft of the famous letter written to the English prince regent in which Napoleon threw himself upon the mercy of his conquerors.

The newspaper, the Paris Midi, comments how the harsh treatment that Napoleon received then from England differs from the exile in Holland imposed on the former Kaiser.

No Use For It

Old MacTavish was not a mean man. No; he just knew the value of money.

"Say, doctor, hoo's beezness wi' ye the noo?"

"Oh, fair, fair!"

"I s'pose ye've a deal o' prescribin' tae dae fer coolds an' sair throats?"

"Ah."

"An' what dae ye gin'rally gie fer a sair throat?"

"Naethin, I dinna want a sair throat."

Airport For Banff

An effort is being made to establish an airport at Banff. Government officials have inspected a site near the present golf links and the prospect that a field will be prepared within the next year is bright.

Registration of a trade-mark in Mexico confers the exclusive right to its use by the registrant.

Profits In Poultry

Barred Plymouth Rock Pullet Lays 365 Eggs In 365 Days

Excellent work with poultry has been done on the Experimental Station at Lennoxville, Quebec. A year ago a Barred Plymouth Rock pullet laid 365 eggs in 365 days, and the report of the superintendent of the farm contains further particulars of this pullet officially known as C.H. 188.

The eggs laid by this bird had a market value of \$12.82, and the cost of feeding her was \$2.35, leaving a profit over cost of feed of \$10.47. She was hatched on May 1st, and laid her first egg December 5. As a pullet commencing to lay she weighed 5.5 pounds. Her best laying period was an egg a day for 33 days. During the cold months of January, February, and March, she missed laying on eleven days.

Another test reported was with 125 Barred Rock pullets housed in the permanent straw loft type of laying houses. These pullets commenced to lay November 1st and in the year produced 19,456 eggs which at market prices sold for \$834.98. Feed consumed was valued at \$316.26 or an average of \$2.53 per bird. The average production brought a revenue of \$6.67 per bird, giving a profit of \$4.14 per bird over cost of feed.

During the four winter months November, December, January, and February, the cost of feed for a pullet has worked out at 77.29 cents. The prevailing market price for eggs during that period averages 66 cents per dozen, so that it requires 11 eggs during these months to cover the feed bill.

Cheese and Its Uses

Cheese Is Listed As An Important Article Of Diet

The first cheese factory in Canada was started in Oxford County, Ont., in 1864, followed by the second in Missisquoi, Quebec in 1865. Since that time cheese factories have increased in number and less and less cheese has been made on the farms. The art of cheese making was first introduced by the earliest French settlers.

Cheese is an important article of diet, and the choice of variety is wide as there are some 250 different kinds. These are not all available in Canada, but there are sufficient to give the housewife a chance to satisfy the tastes of the family.

Pamphlet No. 7, new series on "Why and How To Use Cheese," will help the housewife to provide a variety of cheese dishes, as it contains about forty recipes in which cheese is used. The pamphlet will be mailed on application to the Publication Branch, Department of Agriculture, Ottawa.

Nearly all the protein of milk is retained in cheese. Whole milk cheese also contains the vitamins indispensable to growth and mental development. For older boys and girls and adults, cheese is one of the best muscle builders and one which is entitled to a larger place in our menus.

Power Installation Growing

During the year 1927 the hydraulic installation of Canada was increased by 221,655 horse-power actually placed in operation while other construction progressed to the point where an additional 550,000 horse-power will be in place by the end of 1928, by which time over five million horse-power will be installed.

Counsel: "Was the plaintiff expensively garbed?"

Witness: "She was indeed. 'Er garb must 'ave cost a small fortune."

Discover Monument Of Unknown Race

Beautiful Stone Pyramid Has Been Unearthed In Central America

An unknown race which preceded the Mayas built a beautiful stone pyramid some 2,000 years ago in a city of what is now north Guatemala. Scientists of the Carnegie Institution of Washington described the puzzling monument to the International Congress of Americanists meeting in New York.

The pyramid, 85 feet square at the base and 25 feet high, was ascended by four stairways, one on each side, and colossal masks of stone on each side guarded the holy place of the prehistoric priests from the ungodly, representing fearsome faces of men and serpents.

The top was flat and undoubtedly was used as a place of sacrifice. The pyramid was covered with a glittering white stucco.

Time passed, and for some unknown reason, the pyramid was completely buried under trees and rubble, doubling the size of the mound. Archaeologists found the larger mound, and around it evidence that it was used—at about the opening of the Christian era—as a huge sundial, from which the priests observed and determined the equinox and solstices of the sun.

Digging into the larger pyramid, located at Uaxactun, the lesser, more beautiful pyramid was discovered, and it has just been uncovered and explored this year.

Lending color to the theory that the pyramid was for sacrifices, a headless skeleton of a woman of about 25 years was found buried under the flat surface of the top.

The architecture does not correspond to any Mayan architecture known, and is believed to be that of a race which preceded the Mayas, possibly the race from which the known Mayas descended.

An Agricultural Expert

Young Man From Holland Will Pursue Studies In Farm Methods

Peter Keyser, B.Sc., a young Hollander, who arrived in Canada in 1924, with no knowledge of the English language and went on a farm at St. Albert, near Edmonton, and then in 1926 entered the Oids School of Agriculture, from which he recently graduated, now proposes continuing his studies at the University of Alberta, or else at Guelph, with a view to winning the degree in agriculture. He considers that the combination of good lands and good, free education in Alberta should make an irresistible appeal to his countrymen.

Planes Aid Prospectors

The mining industry in Manitoba is using airplanes on a bigger scale than ever before, both for transportation over distances of several hundred miles, where there are no railroads, and for tracing from the geological structures and formations. In territories adjacent to bodies of water they have been used to follow the line of ore bodies, some of which have been plainly visible across beds of more shallow lakes.

U.S. Farmers For Canada

A party of thirty landseekers from Kansas and Nebraska, passing through Winnipeg recently, reported purchases of about 8,000 acres of farm lands at a cost of about \$160,000. L. B. Boyd, in charge of the group, expressed the belief that every man in the party would settle in Canada and bring his family. The party was much struck by the quality and appearance of the grain crops.

Says Britain Going Dry

Sunday Express Gives Figures To Prove Its Assertion

The Sunday Express recently proclaimed in the headlines on its front page that "Britain is rapidly going dry."

The consumption of liquor in England during the last fiscal year was less than a third of that consumed at the beginning of the century according to figures just issued.

The 1900 consumption of spirits in England was 32,239,522 gallons as compared with 10,412,921 gallons last year. Before the war there were 2,000,000 total distillers where now there are 10,000,000. The annual per capita drink bill has dropped to \$33 from \$50.

"These figures reveal the radical improvement in our social habits," says the Express. "Drunkenness is now a rare spectacle in towns and villages. This great social revolution is due partly to education, partly to the motor car, partly to sports and partly to the increase in healthy amusements."

Drying Damp Wheat

Grain Can Be Dried Without Injury To Milling Or Baking Qualities

A two years' investigation of the problems connecting with the drying of tough and damp wheat by the associate committee on grain research of the national research council has resulted in the announcement that grain can be dried without injury to its milling and baking qualities.

Experiments carried on by the research council, the Universities of Alberta, Saskatchewan and Manitoba and the Dominion grain research laboratory at Winnipeg, were compared and showed a gratifying uniformity.

The investigation was conducted to settle the question as to the effect of heat drying on the milling and baking qualities of the wheat, the experiment being made through a drier so constructed as to give absolute control over all conditions of drying.

The committee agreed that 180 degrees F. is the maximum safe temperature for the drying air where it enters the grain.

With regard to the storage of grain experimental results show that sound grain stored during the winter in a damp condition undergoes no deterioration. The applicability of these results to elevator storage has not been investigated.

Charged by the Dominion Government with the investigation of protein as a grade factor, two varieties were tested with the result that Parker's Marquis and Hard Federation were found to be inferior in baking and milling quality to Marquis.

Harness Wind For Electric Power

Electricity Generated By Winds Now Affords Cheap Power For Western Homes

Electricity, generated by the winds which blow over the prairies of Western Canada, is being used to furnish current for electric lights, washing machines, electric irons, and other labor saving devices in the farm homes of the country.

Wind power has, of course, been used in many countries for generations, but it has had this disadvantage of being irregular in its application. By using the power of wind to generate electricity which is stored in electric batteries inventors have overcome this difficulty. Electricity can be generated with a ten-mile wind and stored until required. The batteries will furnish power during a period of calm lasting as much as ten days.

Electricity is already very widely used in Canada, most of it being generated by water-power. The harnessing of the winds now affords cheap electric power for prairie homes. The only cost is the initial one; and after machinery is installed nature does the rest.

No Particular Hurry

The Scotelman had fallen into the well and, while swimming around in it, called to his wife. She came running to him and asked: "Shall I call the servants from the field, that they may pull you out?"

"What time is it?" inquired he.

"Eleven-thirty," said his wife.

"Well, never mind," said he. "I'll swim around until dinner time."

King George Economical

Styles in yachting clothes may change from year to year for ordinary mortals, but they don't change for King George of England. He recently confided to a friend that he had worn the same yachting cap for the past 11 years, and the same white flannel trousers for the past 10.

Reaper-Thresher Garners Grain

The mechanization of farm operations in Western Canada is here instanced. A reaper-thresher at work in Western Canada. The boy unloading grain into the wagon is E. Philpott, of Liverpool, England, one of the army of harvesters which came to Canada to help gather the Dominion's record crop.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE CRIMSON WEST

— BY —
ALEX. PHILIP

Published by Special Arrangement
With Thomas Allen, Publisher,
Toronto, Ont.

CHAPTER II.—Continued.

The next day, dressed in light clothing and a pair of running shoes, Donald went around Stanley Park. Wishing to condition himself, he ran the greater part of the way.

Spring comes early in Vancouver as compared with the West. In January the buds are bursting in Stanley Park. The balmy sea air, scented with earthy odours from the deep woods, seemed to Donald to possess magic properties. The blood sang in his veins. Overhead, big white seagulls screamed and soared; squirrels retreated in chattering fright as he raced down the road, and over all was the sound of the booming surf. The wind rushed past his ears, and he shouted aloud from sheer exuberance of spirits and the joy of living.

Donald covered the distance from English Bay to Granville Street at a jogging trot. The air of the gymnasium seemed close after being in the open. The big Australian fighter was in the ring with one of his sparring partners. The slap of gloves was like music to Donald's ears.

"Just in time," welcomed Andy as he led him to the dressing-room, where he quickly shifted to fighting togs and then walked over to the ring.

A crowd of boxing-fans sat by the ring-side watching the big fellow work out. Donald's entrance caused a stir. His lithe, muscular body was the attraction of all eyes.

"Op in," commanded Andy.

While an attendant was putting on his gloves, Donald studied the big man he was to help train. He would weigh at least two hundred pounds. His shoulders were enormously broad and square, and the muscles of his arms stood out in knobs and bunches. His face was a rusty colour, as though his training had been done inside. His jaw was square and strong, his eyes a mild blue, and his nose looked as though it had stopped many a solid punch. "Strong but slow," Donald decided.

When Andy introduced him Hagin merely grunted. To the fighter Donald was simply one more punching-bag.

Donald turned to Andy. "What do you want me to do?" he asked.

"Oh, knock the blighter out of the ring," rejoined Andy, with just a touch of sarcasm.

"Do you mean that?" queried Donald quickly.

Andy nodded.

Hagin came to the centre of the ring, assuming an awkward crouch, his arms wound about his face. Donald

aid circled him warily. The big man feinted with his left. Donald danced within range, and the Australian let loose a terrific right swing that would have felled an ox. Donald sidestepped, jabbed his left twice to his opponent's face, and his right missed Hagin's jaw by the fraction of an inch. A surprised look came over the big man's face. A murmur of applause came from the audience.

"Strike me pink! What is left and!" ejaculated Andy. Hagin scowled and tried to bring the fighting to close quarters, but was easily avoided by his lighter opponent.

Donald now took the aggressive. His left found weak spots in the big man's defence, and repeatedly he sent in stinging jabs that drove his adversary's head back with a snap. Try as he might, Hagin could not get away from that whizzing left. It is a bitter pill to be beaten by one's sparring partner. So far the Australian had been given a boxing lesson. He forced Donald into a corner and made for him savagely. Donald ducked under the fist-like swings, and shot a left upper-cut to Hagin's jaw. The latter staggered weakly to the ropes. Donald was after him like a flash. Just then he saw Andy gesticulating wildly and shaking his head. Hagin lunged forward and Donald fell into a clinch. The gong rang.

"What's the trouble, Andy?" asked Donald as he reached his corner.

"Strike me lucky!" whispered Andy hoarsely. "You're punchin' me meat-ticket. You're makin' a blinikin' boob out of me 'cavyweight."

"You told me to knock him out of the ring," reminded Donald.

"Sure I did. But 'ow the 'ell did I know that you 'ere a blinikin' cyclone? Strike me blind, a left and like that I 'aven't seen since I 'anded Young Griffo."

"What shall I do in the next round?"

"Tyke a punch and go down—'urt your 'and—anything to quit. But for 'eaven's sake don't mess up me 'cavyweight any more! If the public ever 'ears of this our big fight is all off!"

In the next round Donald dropped to the floor as they broke from a clinch in the centre of the ring. He rose to one knee, holding his hand and making a wry face.

"Too bad," sympathized Andy as he ordered him to the dressing-room.

As Donald stepped from the ring he was intercepted by a curly-haired youth whose brown eyes sparkled with enthusiasm. "By golly, I want to know you. My name's Douglas Rennie. My, but that was a wonderfully fast exhibition you gave us," he ejaculated, gazing at Donald with undisguised admiration.

Donald flushed. "I appeared fast," he explained modestly, "as I was against a very slow opponent. I know nothing of Garriau, but he won't have to be very clever to beat the Australian."

"Garriau is fast and carries a knockout in either hand."

"I'm sorry for Andy's man if that is the case, as any kind of a left will beat Hagin. Come to the dressing-room," invited Donald.

A moment later Andy entered and sank dejectedly to a locker seat.

"You look rather blue, Andy," observed Donald.

"I am. All 'ell's a poppin'," admitted Andy.

"What's wrong?"

"I've lost me 'cavyweight. 'E's quit."

"Why?"

"Said I framed on 'im by sending you in this afternoon. Said I 'urt 'is pride."

"Pride!" echoed Douglas sarcastically. "You've been treating 'im too well. I never thought much of 'im as a fighter. You're too good a trainer to be wasting your time on third-raters."

"Maybe you are right," conceded Andy. "but look what a blinikin' mess I'm in now! 'Ere I am in the 'ole three hundred bones for training expenses, and I've put up a forfeit with

the promoters for appearance. I'll lose the 'ole lot." He threw out his arms with an air of resignation and sank back in his seat.

Little Andy presented a pitiful figure as he sat hunched in the corner—his jaunty manner gone; his blond head, usually held at a saucy angle, sunk on his chest. Gloom, deep, impenetrable gloom, enveloped this bright spirit from the Antipodes.

Donald knew now that for all Andy's munificent manner of yesterday, the three dollars to "ent on" and the sorely needed dinner he had bought, had come from a generous heart, but a depleted purse. Here was his benefactor in trouble. How could he help him? He crossed the room, sat down beside Andy, and placed his hand on the little man's arm.

"Andy, take me on. I'll fight Garriau for you."

Andy came to his feet with a jump and seized Donald by the shoulders. "If you'll do that, me lad, I'll be your pal for life. Strike me pink, did you 'ear that? I've got a real fighter nt last! 'Ooray!" The little fellow was in ecstasies. "We'll clean Garriau up," he went on excitedly, "and then I'll tyke you to the Stytes, and then to Austrilla, and..."

"Hold on," interrupted Donald laughingly. "looks like you intend making a professional pug out of me. I'm doing this to help you, Andy, and," flushing in spite of himself, "I'm broke."

Andy glanced over Donald's tall figure with a professional eye. "You 'ave a week to get fit, and 'as you 'ave n't 'ardly any weight to tyke off, you should be top 'ole in that time."

"May I work out with you?" asked Douglas eagerly.

"Glad to have you," replied Donald. A few minutes later the young man stepped to the street. Douglas seemed both to go.

"Will you come to my home for dinner?" he invited.

Donald hesitated. It seemed ages since he had entered a private house. He glanced down at his only suit, which was rather seedy, then looked up, to find the usually roguish eyes of his companion fixed upon him seriously.

"Thanks, old man. I hope I may have the pleasure at some time, but I can't do it now."

"You said you were broke," began Douglas, hesitatingly. "enn—I—"

"No, no, I'll see you tomorrow," interrupted Donald, turning abruptly and walking swiftly down Granville Street.

Douglas stood watching him until he disappeared. "A mighty good sport," he said softly.

(To Be Continued.)

Farmers Rebel Against Soviets

Growing tension between farmers and the Soviet authorities, mainly in consequence of the requisition of grain, is reported by persons arriving from the Ukraine, South Russia. Dissatisfaction has resulted in open insurrection. Soviet houses have been set on fire and Soviet agents roughly handled.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's
CASTORIA

"RED ROSE TEA"

Reduced in Price

Lower Markets for good medium quality teas enable us to reduce the price of GREEN LABEL Red Rose Tea from 80c. to 75c. per lb. package, and to 38c. for the ½ lb.

The new prices will apply on stocks now on hand in the stores, as arranged with all the merchants who sell Red Rose Tea.

But due to an increasing demand the world over, the markets for extra fine quality teas, such as RED ROSE ORANGE PEKOE, are higher rather than lower—so we regret we cannot make any reduction in this grade at present.

RED ROSE TEA is put up only in Clean, Bright Aluminum Packages. The very best container for good quality tea.

Censored The Temperature

Chinese Newspapers Decreased Figures So People Would Work

The temperature was censored in Hankow recently. A hot spell caused a newspaper controversy over the heights attained by the mercury, and the charge was made that the figures were deliberately decreased.

Each day the weather apparently had been getting hotter, and each day the public scanned the temperature in the newspapers, only to find it just one or two points below 100. A reporter was sent to investigate, and the Chinese authority informed him: "If we put the figure at more than 100 the public will think it is too hot and not work so hard."

This was duly published. The next day the aggrieved authority refused to give out any figures on temperature or winter minks, and for a day the public had to depend upon their home thermometers. However, an outcry in the public press forced the "censorship" to be suspended after one day.

Good Roads Necessary

One Thing Country Cannot Afford To Do Without

The world is now moving on wheels and a province that does not provide the facilities for allowing the wheels to turn will be left far behind in the march of progress. The roads that will have to be built in Western Canada to keep these provinces anywhere in line with the states to the south will cost a great amount of money. The point is, however, that while you may afford to do without some things good roads are not one of them. The money spent on roads, if expended wisely, will earn dividends. Good roads that will permit free flow of traffic in all kinds of weather are as essential to the business of the modern community as telephones, telegraphs and railways.

Rather A Hard Job

An Irish county council were in discussion over the provision of a new bridge in place of an old one.

These extraordinary propositions were submitted at the meeting by one of the members:

- (1) That the old bridge be removed and a new one built in its place.
- (2) That the materials of the old one be used in the construction of the new bridge.
- (3) That the old bridge be left standing until the new one is completed.

A Generous Gift

London.—An anonymous contributor, believed to be an American, has given the British treasury \$15,000 in United States Steel five per cent. bonds, to help payment of interest on the British debt to the United States. Winston Churchill, chancellor of the exchequer, expressed appreciation of "the spirit which inspired this gift."

"How's your wife coming along with her driving?"

"She took a turn for the worse last week."

Lake Balkal, in Siberia, is 4,500 feet deep.

May Be Paroled

Loeb And Leopold Eligible For Parole In Six More Years

An error in mittimus under which Richard Loeb and Nathan Leopold, Jr., were sent to the Joliet penitentiary four years ago makes these two slayers of little Bobby Franks eligible for parole in six more years. Hinton Clabaugh, chairman of the state board of pardons and paroles, has stated.

Clabaugh spoke of Loeb and Leopold as "sons of wealth, who are pampered pets in Joliet."

These men, each under life sentences for kidnapping, are building up "fine records," Clabaugh said, with a view to seeking parole when, because of the error in the mittimus, they became eligible within six years.

"One is private secretary to the first warden," Clabaugh said, "while the other is private secretary to the Protestant chaplain. Yet Leopold is generally believed to have been the brains of the prison outbreak a few months ago which has cost so far several innocent lives and resulted in the hanging of three men."

He: "You know, dear, we have had our new home just 12 months."

She: "Gracious! And it seems like a year."

Little Helps For This Week

"Lord, teach us to pray."—Luke xl.

O Thou by whom we come to God,—
Thou life, the truth, the way!
The path of prayer Thyself hath trod;
Lord, teach us how to pray.
—James Montgomery.

Wherever there is religion there is prayer, and wherever there is a religious soul there is heard the language of prayer.
—Francis B. Hornbrooke.

Three mustna undervally prayer. Prayer mayna bring money, but it brings us what no money can buy,—a power to keep from sin, and to be content with God's will, whatever He may please to send.—George Eliot.

Exercise

You need a cool and soothing rub down with Minard's Liniment after any form of exercise.

EVEREADY Radio Batteries

—they last longer

Use Eveready Layerbilt "B" Batteries for Economy

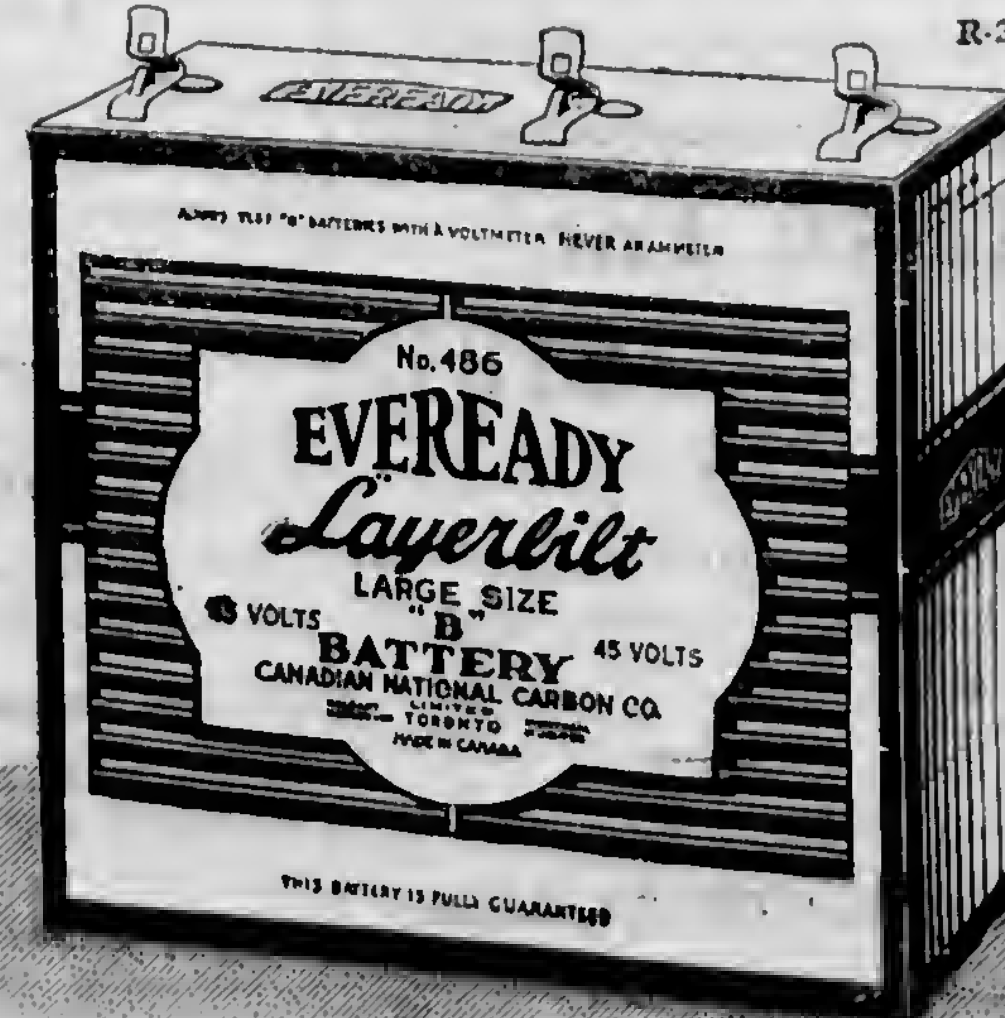

Here is positively the lowest-priced, satisfactory, longest-lasting "B" power you can buy.

Eveready Layerbilt batteries completely meet the "B" power requirements of every radio receiver. Three sizes—large, 45-volt; medium, 45-volt; small, 22½-volt. All Eveready Layerbilt quality at new low prices.

Equip your radio set with Layerbilt batteries and enjoy many months of carefree, better reception.

How to Make Rice Pudding

A TESTED RECIPE

That Adds New Flavour:

4½ cups rice 2½ cups Borden's
1-3 cup sugar St. Charles Milk
½ tspn. salt 1½ cups water
Nutmeg

Wash the rice thoroughly, then add with the sugar and salt to the milk diluted with water. Pour into a buttered baking dish and add a sprinkling of nutmeg. Set the dish in pan of hot water and bake three hours in a slow oven (300°F.), stirring several times the first hour to prevent the rice from settling to the bottom. Serve hot or cold.

He Told the Truth

Editors, too—sometimes they are obliged to battle with a conscience; often they become talented and accomplished liars.

The story goes that the editor of a country newspaper grew tired of being called a liar, and announced that his next issue would tell the truth and nothing but the truth. Following are a few of the items he used:

John Blake, the laziest merchant in town, shut up his shop and went to the ball game on Monday. John Jones' grocery store is doing a rotten business. No wonder—the store is a mess.

Charles Cleaver died at his home here Tuesday. Heart failure, the doctor said, but everyone knows whiskey killed him.

Married—Miss Annette Blair and James Simpson, last Saturday at the parsonage by the Rev. Green. The bride is a very ordinary girl who doesn't know any more about cooking than a jack rabbit and never helped her mother more than three days in her life. Not a beauty by any means—when she walks she waddles like a duck. The groom is a modern loafer who has lived off his folks all his life and who is not worth shucks. It will be a tough life.—Pincher Creek Echo.

1,000,000 Bu. of Wheat Harvested

Threshing is nearly completed in this district due to the long period of splendid harvest weather. This year has brought us a most bounteous harvest. This district has produced in the neighborhood of 1,000,000 bushels of wheat, which amount, turned into bread would make 54,000,000 loaves, or would supply the entire population of the United States with one half loaf of bread for each person, or sufficient for one day. If our local baker undertook to make this bread, at the rate of 500 loaves per day, it would take him 109,000 days or 300 years to do the job. He would use 450 tons of salt.

In contemplating the future it would not be at all improbable to say that a large storage elevator will be built by the farmers where their grain could be cleaned and the screenings fed to live stock. This year alone 20,000 bushels of screenings will be shipped away and given to someone else, the farmers even paying the freight on it. The present situation with thousands of bushels of wheat on the ground or in open bins point to the dire need of such a structure.

The attitude of large wheat buyers at the terminals has been decided bullish during the past three weeks and prices have been going up steadily. Owing to the early frost in August with the Dominion and the consequent reduction in grade and yields, early estimates of the Canadian crop have been reduced which would in its way effect the market price.

WANTED—Board and rooms, and light housekeeping accommodations for School of Agriculture students. Write Principal O. S. Longman at the School stating rates per week and the amount of accommodation.

FOR SALE—1 Cream Separator and 1 Coal Heater. Both of these articles have been used only 3 months. Bargain price for cash.—Apply H. C. Christensen. 012

FOR SALE—3 heaters, 1 ax-minister rug 9 x 12 ft. 1 red plush couch, 1 walnut radio table, 1 Brunswick range, 6 chairs, New Ampliphonic. Beautiful silk panels and drapes. New Maytag electric washer. Bargains for cash.—Apply to R. C. Graham.

WARNING—Children about town have cultivated the dangerous habit of hanging on to passing vehicles. In the future any child found doing this will be handled by officers of the law.

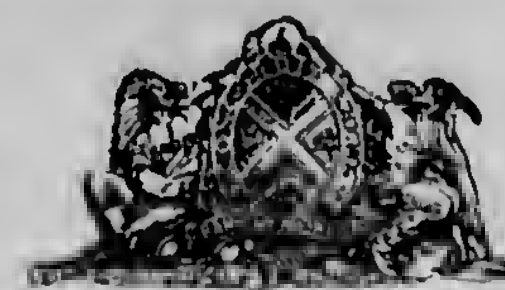

Miss Amy Conroy R. N., public health nurse, will be in Raymond October 15, 16, 17 for the purpose of giving lectures on "Infectious Diseases", "Diet of the School Child", "Obstetrics and Care of the Baby". The lectures will be held under the auspices of the Women's Institute in the United Church at 2.30 each afternoon and are free. All ladies are invited.

Fire Prevention Week

Governments, Insurance Companies and Individuals all unite to reduce the fire risks.

Remove all rubbish, keep all combustible materials away from homes and valuable property. This will save millions of waste.

It is Your Only Safety

DOMINION OF CANADA REFUNDING LOAN BONDS

MATURING 15th OCTOBER, 1928

THE BANK OF MONTREAL, at all of its Branches in Canada, will accept the above bonds for redemption at maturity.

For the convenience of owners of the bonds, the Bank of Montreal will accept the bonds at any time prior to October 15th, and will make payment either by issuing a cheque or by placing the amount to the owner's credit in the books of the Bank, as may be desired.

THE YEAR OF HOMEGOING.

The reaper-thresher garners a bumper crop, and the man of the west contemplates the golden stream as it poured from wagon to conveyor. (Inset)—On the Duchess of Athol, homeward bound.

There has been a record crop. The West will continue to flourish. In a thousand cases, a few years of struggle with nature has been rewarded. And what will it mean? more roads, more cars, more machinery, more streets and stores and homes and radios. A brisker trade, more industrial activity in the east, more shipping and more car loadings per mile. More wheels turning all over the country.

But the man whose labours by the favour of Providence has been mainly responsible for all this. His threshing done, he has time now to think of other things: than wheat and rain and frost and sun and harvesters and the rail and steamship companies are anticipating his thought. In a few weeks now, there will be a feverish packing of bags, a collecting of the children, a donning of new hats and shoes and a rush for the trains.

This, say the transportation officials will be the year of the home-going. The English, the Jersey Islanders, the Scotch and the Irish and the Continentals too. The Canadian Pacific officials foresee so great a trek that they have already planned many special trains out of the West, and many steamship lines which will facilitate the movement and ensure Christmas and New Year's with the old folk and an inexpensive journey in comfort and luxury.

The Minnedosa will give the more fortunate ones a sailing from Montreal on November 28 for Glasgow, Belfast and Liverpool. On the seventh of December the Metagama and Montclare will sail from Saint John, one for Cherbourg, Southampton and Antwerp and the other for the Liverpool run. The Melita, sailing on the fourteenth, will stop en route at St. Helier with a large number of home-going Channel Islanders and the Duchess of Athol sailing on the fifteenth will take the last of those going home for Christmas via Glasgow or Liverpool. The sailing of the Montroyal on the twenty-first is for those to whom New Year's means more.

Just to illustrate to what great extent a good western crop effects industry; one printing establishment was kept busier than usual for some time printing an extra order of Canadian Pacific travellers cheques and money orders. These will, an official said, be sent or carried by homegoers to practically every quarter of the civilized world. Whatever the world crop conditions may be, the Canadian crop will be appreciated almost wherever men eat bread.

Rex Meeks suffered a badly gashed head last Sunday, when the horse he was riding began bucking violently, cutting the rider unprepared. The gash was about four inches long and cut through to the bone. Surgical aid was rendered, and the patient is recovering rapidly.

Mr. and Mrs. H. D. Weaver of Barnwell were visitors in town last week end.

This week saw the installation of a complete Frigidaire cooling system at Holt's Meat Market. Both the ice box and the display case or equipped with this up-to-date appliance.

A bridal shower was held in honor of Mrs. Austin Torry, (nee Miss Mabel Rusk) last Wednesday evening at the home of Mrs. Emma Dahl. The guest of honor received many beautiful presents.

Mr. W. J. Stephens, Provincial Field Crop Commissioner, was in Raymond last Tuesday to arbitrate a diension that had arisen between the Sugar City Municipal council and the government weed inspector regarding the measures used in the eradication of weeds the past summer. An amicable settlement was made.

LOST—Ladies Brown Purse containing \$8 in bills, and other valuables. Finders please return to Recorder office and receive reward.
